A nuclear spin relaxation study of the spin–rotation interaction in symmetric top molecules. R. L. Armstrong and J. A. Courtney, 1262.
The observation of incipient phase transitions in K_2PtCl_6, K_2PdCl_6, and K_2IrCl_6. R. L. Armstrong and H. M. Van Driel, 2048.
Arrott, A. S.
Domain configurations, Bloch walls, and magnetization processes in iron whiskers from D.C. to 200 kHz. Theory and experiment. I. B. Heinrich and A. S. Arrott, 710.
Athenour, C.
Analyse rotationnelle de la bande (0, 0) du système orange de ScO. R. Stringat, C. Athénour et J. L. Féménias, 395.
Atherton, D. L.
Magnetic levitation: linear synchronous motor efficiency. D. L. Atherton, L. E. G. Love, and P. O. Prentiss, 3143.
Audet, J.-C.
Microtron supraconducteur: limitations, pertes. A. Alaux et J.-C. Audet, 298.
Aziz, R. A.
An examination of the relationship between sound velocity and density in liquids. R. A. Aziz, D. H. Bowman, and C. C. Lim, 646.
The law of corresponding states as applied to sound velocity in liquids consisting of elliptical molecules. G. R. Poole and R. A. Aziz, 721.
Bulk modulus in polycrystalline inert gas solids at 0 K. R. A. Aziz, D. H. Bowman, and C. C. Lim, 2027.
Azuma, R. E.
Excitation energy of the fourth excited state in ^{18}F. I. Berka, C. Rolfs, and R. E. Azuma, 1682.
Bachynski, M. P.
Strong-field electromagnetic wave interaction with anisotropic plasmas. M. P. Bachynski and B. W. Gibbs, 826.
Pulse distortion by anisotropic plasmas. M. P. Bachynski and B. W. Gibbs, 1221.
Bacis, R.
Nouvelles transitions électroniques attribuées à la molécule LuH. J. d'Incan, C. Effantin et R. Bacis, 1810.
Bahal, B. M.
A rotational flow for the study of rotations of deformed even–even nuclei. V. R. Prakash, B. M. Bahal, and V. K. Deshpande, 2957.
Bahar, E.
Generalized Fourier transform for stratified media. E. Bahar, 3123.
Radio wave propagation in stratified media with nonuniform boundaries and varying electromagnetic parameters: full wave analysis. E. Bahar, 3132.
Baker, D. J.
Silver film atomic oxygen sensors. R. J. Thomas and D. J. Baker, 1676.
Bakhru, H.
Energies and intensities of γ rays in the decay of ^{79}Sr. I. M. Ladenbauer-Bellis, H. Bakhru, and B. Jones, 3071.
Bailly, D.
Etat stationnaire dans des plasmas CO_2–N_2, CO_2–He et CO_2–N_2–He produits par décharge électrique. D. Bailly, D. Gaultier, C. Rossetti et P. Barchewitz, 2605.
Baldis, H. A.
Transient light emissions from a laser perturbed plasma. H. A. Baldis, R. A. Nodwell, and J. Meyer, 2338.
Balfour, W. J.
Rotational analysis of the $A^1\Sigma^+ \rightarrow X^1\Sigma^+$ and $B^1\Pi \rightarrow X^1\Sigma^+$ systems of $^{24}MgH^+$, $^{25}MgH^+$, and $^{26}MgH^+$. W. J. Balfour, 1082.
Rotational dependence of Franck–Condon factors in the $A^1\Sigma_u^+ \leftarrow X^1\Sigma_g^+$ system of $^{24}Mg_2$. W. J. Balfour and R. F. Whitlock, 1648.
Ball, R. N.
Temperature dependence of bulk viscosity in liquid argon. J. A. Cowan and R. N. Ball, 1881.
Ballentine, L. E.
Electronic structure of liquid metals from nonlocal energy-dependent model potentials. T. Chan and L. E. Ballentine, 813.
Ballik, E. A.
Gain method for the measurement of isotope shift. E. A. Ballik, 47.
Balzarini, D. A.
Interferometric measurements of isotherms of sulfur hexafluoride in the critical region. D. A. Balzarini, 2194.
Banerjee, J.
Texture of aluminum wire. R. L. Banerjee and J. Banerjee, 16.
Banerjee, R. L.
Texture of aluminum wire. R. L. Banerjee and J. Banerjee, 16.
Barber, R. C.
Precise atomic-mass differences in the region $59 \leqslant Z \leqslant 69$. R. C. Barber, R. L. Bishop, J. O. Meredith, F. C. G. Southon, P. Williams, H. E. Duckworth, and P. Van Rookhuyzen, 34.

Nucleon separation and pairing energies, decay energies, and atomic masses for $59 \leqslant Z \leqslant 69$. J. O. Meredith and R. C. Barber, 1195.

Barbarie, A.
Oscillatory spectral distribution of the photoelectromagnetic effect associated with direct interband transitions in germanium. A. Barbarie and E. Fortin, 1593.

Barchewitz, P.
Etat stationnaire dans des plasmas CO_2–N_2, CO_2–He et CO_2–N_2–He produits par décharge électrique. D. Bailly, D. Gaultier, C. Rossetti et P. Barchewitz, 2605.

Bardsley, R. E.
Zero-field level crossing in the helium atom. C. W. T. Chien, R. E. Bardsley, and F. W. Dalby, 116.

Barnard, A. J.
The formative phase of a low pressure, high voltage Z pinch. C. S. Maclatchy and A. J. Barnard, 2475.

Barrett, J. S.
Temperature dependence of the hyperfine field at ^{181}Ta nuclei in a nickel lattice. J. S. Barrett, J. A. Cameron, Z. Zámori, and D. C. Santry, 619.

Barrie, R.
The Stokes' shift in impurity spectral lines. I. Mathematical technique. R. Barrie and I. W. Sharpe, 222.
The Stokes' shift in impurity spectral lines. II. Relationship to the adiabatic approximation approach. R. Barrie, I. W. Sharpe, and B. L. Jones, 231.

Barton, R. D.
Delayed coincidence measurement of the picoseconds lifetime of the 9.699 MeV (5^-) level of ^{28}Si. R. D. Barton, J. S. Wadden, A. L. Carter, and H. L. Pai, 1282.

Basinski, J.
Conduction band parameters in GaSb from high-temperature transport measurements. J. Basinski, C. C. Y. Kwan, and J. C. Woolley, 1068.

Bassalo, J. M.
Broadening and shift of atomic lines produced by fast electron collisions. J. M. Bassalo and M. Cattani, 151.

Baylis, W. E.
The repulsive part of the potential between Hg atoms and light atomic projectiles. A. van Wijngaarden, B. Miremadi, and W. E. Baylis, 1938.

Beaudry, G.
L'effet de la dynamique d'une impulsion-laser sur le chauffage de plasmas confines. G. Beaudry et J. Martineau, 594.

Becker, E. H.
Study of single crystals of magnesium and zinc by positron annihilation. E. H. Becker, E. M. D. Senicki, A. G. Gould, and B. G. Hogg, 2520.

Beckmann, P. A.
Observation of the influence of centrifugal distortion of the methane molecule on nuclear spin relaxation in the gas. P. A. Beckmann, M. Bloom, and E. E. Burnell, 251.

Behrman, R. H.
Shell-model calculations for ^{28}Si. R. H. Behrman, 19.

Bélanger, P. A.
Atmospheric pressure CO_2 pulsed laser with semiconducting plastic electrodes. P. A. Bélanger, R. Tremblay, J. Boivin, and G. Otis, 2753.

Bell, T. N.
The concentration dependences of the binary diffusion coefficients of the systems H_2–Ne, D_2–Ne, H_2–N_2, D_2–N_2, H_2–Ar, and D_2–Ar at 1 atm pressure and 300 K. K. R. Harris, T. N. Bell, and P. J. Dunlop, 1644.

Benesch, R.
The Z^{-1} expansion of the nuclear magnetic shielding constant and X-ray form factor for 2-, 3-, and 4-electron ions. R. Benesch, S. R. Singh, and V. H. Smith, Jr., 947.

Bergeron, M.
Pulse duration of a mode-locked Nd–glass laser varying the cavity length and the dye transmission. G. L. Busca and M. Bergeron, 407.

Bergersen, B.
Lifetime effects in metal soft X-ray spectra. T. McMullen and B. Bergersen, 1002.
Positron correlation energy in metals. B. Bergersen and J. P. Carbotte, 1332.
Spurious structure from approximations to the Dyson equation. C. Blomberg and B. Bergersen, 2286.

Berka, I.
Excitation energy of the fourth excited state in ^{18}F. I. Berka, C. Rolfs, and R. E. Azuma, 1682.

Berthou, J. M.
Rotational analysis of bands of the $\tilde{A}^2A_1$–$\tilde{X}^2B_1$ transition of PH_2. J. M. Berthou, B. Pascat, H. Guenebaut, and D. A. Ramsay, 2265.

Best, M. E.
Particle–nucleus scattering at intermediate energies. M. E. Best, 1609.

Betts, D. D.
Dynamical properties of the three-dimensional XY model. R. V. Ditzian and D. D. Betts, 129.
Dynamical properties of the three-dimensional XY model. II. Singularity structure of the frequency dependent susceptibility. S. R. Mattingly and D. D. Betts, 2415.
A test of scaling theory on the critical isotherm. D. D. Betts and L. Filipow, 3117.
Beukens, R. P.
Resonances in the $^{15}N(\alpha,\gamma)^{19}F$ reaction between $E_a = 1.68$ and 2.72 MeV. D.W.O. Rogers, R. P. Beukens, and W. T. Diamond, 2428.
Bezanson, D. S.
A kinetic interpretation of sound absorption in mixtures of argon and nitrogen. A. K. Law and D. S. Bezanson, 1764.
Bhaduri, R. K.
Partly nonlocal potentials in nuclear matter. Y. Singh, C. S. Warke, and R. K. Bhaduri, 2574.
Bhatia, K. S.
New configurations in triply ionized indium(In IV). K. S. Bhatia, W. E. Jones, and A. M. Crooker, 2421.
Bhowmik, G.
Combined Rayleigh and Kelvin instability of a Hall plasma with a vertical magnetic field. G. Bhowmik and S. P. Talwar, 1487.
Billingsley, J.
Absorption spectrum of HSiI. J. Billingsley, 531.
Bishop, R. L.
Precise atomic-mass differences in the region $59 \leqslant Z \leqslant 69$. R. C. Barber, R. L. Bishop, J. O. Meredith, F. C. G. Southon, P. Williams, H. E. Duckworth, and P. Van Rookhuyzen, 34.
Black, J. E.
Umklapp in the electrical resistivity of alkali metals. J. E. Black, 2355.
Blanchard, M.
Selection of a single pulse from a mode-locked TEA CO_2 laser. F. Rheault, J. L. Lachambre, J. Gilbert, R. Fortin, and M. Blanchard, 1876.
Blatt, F. J.
Magnetic field dependence of the thermoelectric power of iron. F. J. Blatt, 2836.
Blomberg, C.
Spurious structure from approximations to the Dyson equation. C. Blomberg and B. Bergersen, 2286.
Bloom, M.
Observation of the influence of centrifugal distortion of the methane molecule on nuclear spin relaxation in the gas. P. A. Beckmann, M. Bloom, and E. E. Burnell, 251.
Boerner, W. M.
On the inverse problem of scattering from a perfectly conducting prolate spheroid. F. H. Vandenberghe and W. M. Boerner, 754.
On the inverse problem of scattering from a perfectly conducting elliptic cylinder. F. H. Vandenberghe and W. M. Boerner, 1987.
On a set of continuous wave electromagnetic inverse scattering boundary conditions. W. M. Boerner and H. P. S. Ahluwalia, 3023.
Boggs, S. A.
The fundamental infrared absorption band of ortho-enriched solid hydrogen. S. A. Boggs, M. J. Clouter, and H. L. Welsh, 2063.
Boivin, J.
Atmospheric pressure CO_2 pulsed laser with semiconducting plastic electrodes. P. A. Bélanger, R. Tremblay, J. Boivin, and G. Otis, 2753.
Boley, C. D.
Kinetic models and Brillouin scattering in a molecular gas. C. D. Boley, R. C. Desai, and G. Tenti, 2158.
Bouanich, J. P.
Spectroscopie par source laser. II. Etude expérimentale de l'élargissement des raies de la transition $00^01-(10^00, 02^00)_1$ de CO_2 perturbé par N_2. Application de la théorie d'Anderson, Tsao et Curnutte au calcul des largeurs des raies de CO_2 pur, et perturbé par N_2. C. Boulet, E. Arié, J. P. Bouanich et N. Lacome, 2178.
Boulay, R.
Field of a truncated Gaussian beam as given by the boundary-diffraction-wave theory. R. Boulay and J. W. Y. Lit, 259.
Characteristic parameters of a beam with a Gaussian irradiance distribution. J. W. Y. Lit and R. Boulay, 301.
Boulet, C.
Spectroscopie par source laser. II. Etude expérimentale de l'élargissement des raies de la transition $00^01-(10^00, 02^00)_1$ de CO_2 perturbé par N_2. Application de la théorie d'Anderson, Tsao et Curnutte au calcul des largeurs des raies de CO_2 pur, et perturbé par N_2. C. Boulet, E. Arié, J. P. Bouanich et N. Lacome, 2178.
Bowman, D. H.
An examination of the relationship between sound velocity and density in liquids. R. A. Aziz, D. H. Bowman, and C. C. Lim, 646.
Bulk modulus in polycrystalline inert gas solids at 0 K. R. A. Aziz, D. H. Bowman, and C. C. Lim, 2027.

Božić-Popović, M.
Theory of biexcitons. M. Božić-Popović, D. I. Lalović, B. S. Tošić, and R. B. Žakula, 898.
Brar, N. S.
Elastic and plastic anisotropy of white tin. N. S. Brar and W. R. Tyson, 2257.
Brett, A. C.
The Mg_2 potential: a curve fitting study. A. C. Brett and C. Chan, 1587.
Brochu, M.
Nouvelle méthode de mesure de la visibilité de la modulation spectrale pour de grandes différences de marche. C. Delisle et M. Brochu, 1993.
Brockhouse, B. N.
Crystal dynamics of platinum by inelastic neutron scattering. D. H. Dutton, B. N. Brockhouse, and A. P. Miiller, 2915.
Brodie, D. E.
Polarizability of a bias–temperature drifted species in thin film transistor structures. J. B. Webb and D. E. Brodie, 1023.
Alternating current photoconductivity of vacuum-deposited films of CdSe, CdS, and CdTe, excited with intensity-modulated light. R. W. Tokarsky and D. E. Brodie, 1114.
The effect of contact annealing on Hall data for MoS_2 layer structures. A. D. Souder and D. E. Brodie, 1223.
Alternating current photoconductivity in a negative photoconductivity region. R. W. Tokarsky and D. E. Brodie, 1685.
Alternating current conductivity in MoS_2 layer structures. A. D. Souder and D. E. Brodie, 2228.
The optical properties of amorphous ZnTe and CdTe. H. M. Brown and D. E. Brodie, 2502.
Structure and electrical conductivity of amorphous ZnTe and CdTe. H. M. Brown and D. E. Brodie, 2512.
Electrical properties of sputtered MoS_2 films. A. D. Souder and D. E. Brodie, 2724.
Brown, H. M.
The optical properties of amorphous ZnTe and CdTe. H. M. Brown and D. E. Brodie, 2502.
Structure and electrical conductivity of amorphous ZnTe and CdTe. H. M. Brown and D. E. Brodie, 2512.
Buchl, R. A.
ρ-dominance electromagnetic pion form factor with vacuum-polarization insertions. R. A. Buchl and B. P. Nigam, 119.
Buchnea, A.
Reactions $^{19}F(\gamma,x\gamma')$ and $^{31}P(\gamma,x\gamma')$. B. J. Thomas, A. Buchnea, J. D. Irish, and K. G. McNeill, 3085.
Buckmaster, H. A.
Matrix elements of the spin–orbit coupling for an l^n configuration in a crystalline electric field. H. A. Buckmaster, R. Chatterjee, and Y. H. Shing, 78.
Ethylsulfate host lattice effects in the EPR spectra of Gd^{3+} ions. H. A. Buckmaster, R. Chatterjee, and Y. H. Shing, 991.
EPR spectrometer sensitivity calculations. H. A. Buckmaster and J. D. Skirrow, 1092.
Bunker, S. N.
Search for broad resonances in ^3He. S. N. Bunker, M. Jain, C. A. Miller, J. M. Nelson, P. J. Tivin, and W. T. H. van Oers, 1295.
Bunn, F. E.
Spectrum of the airglow between 3 and 4 microns. F. E. Bunn and H. P. Gush, 213.
Bures, J.
Détermination de la surface de cohérence à partir d'une expérience de photocomptage. J. Bures, C. Delisle et A. Zardecki, 760.
Théorie exacte de la distribution de la somme des photoélectrons émis en L points. J. Bures, C. Delisle et A. Zardecki, 1307.
Burke, D. G.
Interference effects in two-step reaction processes. D. G. Burke and J. C. Waddington, 700.
Proton states in ^{155}Tb, ^{157}Tb, ^{159}Tb, and ^{161}Tb. J. C. Tippett and D. G. Burke, 3152.
Burke, G. J.
Analysis of wire antennas in the presence of a conducting half-space. Part I. The vertical antenna in free space. E. K. Miller, A. J. Poggio, G. J. Burke, and E. S. Selden, 879.
Analysis of wire antennas in the presence of a conducting half-space. Part II. The horizontal antenna in free space. E. K. Miller, A. J. Poggio, G. J. Burke, and E. S. Selden, 2614.
Burnell, E. E.
Observation of the influence of centrifugal distortion of the methane molecule on nuclear spin relaxation in the gas. P. A. Beckmann, M. Bloom, and E. E. Burnell, 251.
Burnett, N. H.
Absorption of light at oblique incidence on a plasma layer. N. H. Burnett, 3184.
Burt, J. A.
Experimental measurement of the O_2^- photodetachment cross section. J. A. Burt, 2410.
Busca, G. L.
Pulse duration of a mode-locked Nd–glass laser varying the cavity length and the dye transmission. G. L. Busca and M. Bergeron, 407.
Butler, J. P.
Excitation curves for the reactions of fast neutrons with zinc. D. C. Santry and J. P. Butler, 2536.

Buyers, W. J. L.
Positron annihilation and the band structure in molybdenum. S. M. Kim and W. J. L. Buyers, 1777.
Temperature dependence of a Kohn anomaly in molybdenum. W. J. L. Buyers, B. M. Powell, and A. D. B. Woods, 3069.
Calkin, M. G.
Force between metal plates arising from the contact potential. E. W. Guptill, M. G. Calkin, and M. H. Jericho, 2967.
Cameron, J. A.
Reorientation measurement in ^{56}Fe. J. A. Cameron, A. W. Gibb, T. Taylor, and Z. Zámori, 475.
Temperature dependence of the hyperfine field at ^{181}Ta nuclei in a nickel lattice. J. S. Barrett, J. A. Cameron, Z. Zámori, and D. C. Santry, 619.
The magnetic field at tungsten nuclei in iron. J. A. Cameron, L. Keszthelyi, G. Mezei, Z. Szokefalvi-Nagy, and L. Varga, 736.
Camm, D. M.
The resonant Faraday effect. D. M. Camm and F. L. Curzon, 2866.
Campbell, A. M.
Flux line pinning by large normal particles in Type-II superconductors. R. I. Coote, J. E. Evetts, and A. M. Campbell, 421.
Campbell, C. C. M.
Mössbauer effect study of the hyperfine fields at the tin sites in Cu_2MnSn, Ni_2MnSn, and Pd_2MnSn. D. J. W. Geldart, C. C. M. Campbell, P. J. Pothier, and W. Leiper, 206.
Campbell, J. L.
Inner shell vacancy creation in the beta decays of ^{147}Pm and ^{185}W. J. L. Campbell and J. Law, 2451.
Capjack, C. E.
Drift instability in plasmas with nonuniform macroscopic rotation profiles. M. Caplan, C. E. Capjack, and C. R. James, 1795.
Caplan, M.
Drift instability in plasmas with nonuniform macroscopic rotation profiles. M. Caplan, C. E. Capjack, and C. R. James, 1795.
Carabatos, C.
Shell-model lattice dynamics of CsCl, CsBr, and CsI. C. Carabatos and B. Prevot, 122.
Carbotte, J. P.
Nuclear spin–lattice relaxation in superconducting Al. J. P. Carbotte and P. T. Truant, 563.
Positron correlation energy in metals. B. Bergersen and J. P. Carbotte, 1332.
Spin-up-spin-down pair distribution function at metallic densities. B. B. J. Hede and J. P. Carbotte, 1756.
Pressure dependence of the energy gap anisotropy in aluminum. C. R. Leavens and J. P. Carbotte, 2568.
Card, D. N.
Perturbation calculations for a triangular well potential at low densities. D. N. Card and J. Walkley, 1419.
Carleer, M.
Rotational analysis of the $A^2\Pi$–$X^2\Sigma^+$ band system of the BeCl molecule. R. Colin, M. Carleer, and F. Prevot, 171.
Caron, P.
Ion density measurements in the wake of a hypersonic sphere. L. Sévigny, D. Heckman, and P. Caron, 2970.
Carswell, A. I.
Spatially resolved gain measurements in a CO_2 amplifier. A. K. McQuillan, A. I. Carswell, and K. S. Jammu, 769.
Carter, A. L.
Delayed coincidence measurement of the picoseconds lifetime of the 9.699 MeV (5^-) level of ^{28}Si. R. D. Barton, J. S. Wadden, A. L. Carter, and H. L. Pai, 1282.
Castel, B.
Low-lying structure and inelastic scattering of Cu isotopes in a unified model. B. Castel, I. P. Johnstone, B. P. Singh, and K. W. C. Stewart, 1630.
Cattani, M.
Broadening and shift of atomic lines produced by fast electron collisions. J. M. Bassalo and M. Cattani, 151.
Chaba, A. N.
Properties of superconducting alloys containing paramagnetic impurities with local states within the gap. A. N. Chaba and A. D. S. Nagi, 1736.
Chan, C.
The Mg_2 potential: a curve fitting study. A. C. Brett and C. Chan, 1587.
Chan, S. L.
Surface tension of helium II films. S. L. Chan, 1139.
Chan, T.
Electronic structure of liquid metals from nonlocal energy-dependent model potentials. T. Chan and L. E. Ballentine, 813.
Chandna, O. P.
On the uniqueness of MHD aligned flows with given streamlines. O. P. Chandna and V. I. Nath, 661.
Magnetogasdynamic aligned flows with finite electric conductivity. O. P. Chandna and R. W. Holmes, 1273.
Steady transverse plane magnetogasdynamic flows. O. P. Chandna, 2565.

Chandra, S.
High temperature dielectric constants of rubidium halides. S. Chandra and J. Prakash, 1053.
Chatterjee, R.
Matrix elements of the spin–orbit coupling for an l^n configuration in a crystalline electric field. H. A. Buckmaster, R. Chatterjee, and Y. H. Shing, 78.
Ethylsulfate host lattice effects in the EPR spectra of Gd^{3+} ions. H. A. Buckmaster, R. Chatterjee, and Y. H. Shing, 991.
Cheung, C. Y.
Solution of an infinite set of Green-function equations for a trapped electron. B. Frank and C. Y. Cheung, 573.
Onset of localized correlation in a narrow *s*-band. C. Y. Cheung, 1589.
Chia, T. C.
Kaon electromagnetic form factor in a Veneziano-type representation. T. C. Chia, 1652.
Chien, C. W. T.
Zero-field level crossing in the helium atom. C. W. T. Chien, R. E. Bardsley, and F. W. Dalby, 116.
Christophe, B. M.
Excitation and relaxation of the upper laser state in a CO_2 discharge. B. M. Christophe and A. A. Offenberger, 368.
Chuang, S. Y.
Anomalous annihilation of positrons in several solid hydrocarbons. G. DeBlonde, S. Y. Chuang, B. G. Hogg, D. P. Kerr, and D. M. Miller, 1619.
Clayman, B. P.
Anisotropy in the superconducting energy gap of $NbSe_2$. B. P. Clayman, 3193.
Clouter, M. J.
The fundamental infrared absorption band of ortho-enriched solid hydrogen. S. A. Boggs, M. J. Clouter, and H. L. Welsh, 2063.
Cochran, J. F.
Gantmakher–Kaner effect in gallium single crystals. D. E. Gabel and J. F. Cochran, 863.
Doppler-shifted cyclotron resonance in thin metal films. R. Turner and J. F. Cochran, 2122.
A new technique for measuring the velocity of sound in liquid metals. R. Turner, E. D. Crozier, and J. F. Cochran, 2735.
Coey, J. M. D.
The magnetic properties and Mössbauer spectra of synthetic samples of Fe_3S_4. M. R. Spender, J. M. D. Coey, and A. H. Morrish, 2313.
Cohen, M.
Electric quadrupole transitions in Na I, Mg II, and Al III. C. E. Tull, M. Jackson, R. P. McEachran, and M. Cohen, 1169.
Systematic trends in atomic oscillator strengths: the helium isoelectronic sequence. M. Cohen and R. P. McEachran, 1363.
Colbow, K.
Radiative recombination in cadmium sulfide. K. Colbow and K. Yuen, 1518.
Colenbrander, A. H.
A study of thermal neutron capture in aluminum. A. F. M. Ishaq, A. H. Colenbrander, and T. J. Kennett, 2845.
Coleridge, P. T.
Exchange splitting of electron spins in copper-based Kondo alloys. P. T. Coleridge, G. B. Scott, and I. M. Templeton, 1999.
Colin, R.
Rotational analysis of the $A^2\Pi$–$X^2\Sigma^+$ band system of the BeCl molecule. R. Colin, M. Carleer, and F. Prevot, 171.
Collins, M. F.
Zero-point effects in Heisenberg antiferromagnets with arbitrary range of interaction. M. F. Collins and V. K. Tondon, 2991.
Cook, J. G.
Thermal and electrical conductivities of sodium from 40 to 360 K. J. G. Cook, M. P. Van der Meer, and M. J. Laubitz, 1386.
Cook, W. B.
Low-lying positive-parity states in ^{101}Tc. W. B. Cook, M. W. Johns, J. S. Geiger, and R. L. Graham, 1511.
Decay of ^{101}Mo and ^{101}Tc. W. B. Cook and M. W. Johns, 1957.
Coote, R. I.
Flux line pinning by large normal particles in Type-II superconductors. R. I. Coote, J. E. Evetts, and A. M. Campbell, 421.
Coquart, B.
Spectre d'émission de la molécule PO: transition $C^2\Sigma^-$–$X^2\Pi_r$ et nature de l'état C'. B. Coquart, C. Couet, H. Guenebaut, M. Larzillière et T. A. Ngo, 1014.
Spectre d'émission de la molécule PO: la transition $E^2\Delta$–$X^2\Pi_r$; étude de l'état Rydberg $E^2\Delta$. B. Coquart, M. Larzillière et T. A. Ngo, 2945.
Cornet, R.
New electronic transitions of SiO. R. Cornet and I. Dubois, 630.

Costain, C. C.
Microwave spectrum, structure, and dipole moment of cyanogen azide, NCN_3. C. C. Costain and H. W. Kroto, 1453.
Costello, D. G.
(e^+, He) total scattering. D. G. Costello, D. E. Groce, D. F. Herring, and J. Wm. McGowan, 23.
Couet, C.
Spectre d'émission de la molécule PO: transition $C^2\Sigma^- - X^2\Pi_r$ et nature de l'état C'. B. Coquart, C. Couet, H. Guenebaut, M. Larzillière et T. A. Ngo, 1014.
Courtney, J. A.
A nuclear spin relaxation study of the spin–rotation interaction in spherical top molecules. J. A. Courtney and R. L. Armstrong, 1252.
A nuclear spin relaxation study of the spin–rotation interaction in symmetric top molecules. R. L. Armstrong and J. A. Courtney, 1262.
Cowan, J. A.
Temperature dependence of bulk viscosity in liquid argon. J. A. Cowan and R. N. Ball, 1881.
Crane, R. A.
Gain correlation with sidelight and plasma impedance properties of a CO_2 laser discharge. R. A. Crane and A. L. Waksberg, 3067.
Creel, R. B.
Tone-bursting of quadrupolar nuclei. Determination of the spin–lattice relaxation times in ferroelectric lithium tantalate and lithium nicobate. J. D. Stroud, R. B. Creel, S. L. Segel, and R. J. Schoenberger, 966.
Crooker, A. M.
New configurations in triply ionized indium(In IV). K. S. Bhatia, W. E. Jones, and A. M. Crooker, 2421.
Crozier, E. D.
Surface-induced vectorial optical properties of liquid mercury. E. D. Crozier and E. Murphy, 1914.
A new technique for measuring the velocity of sound in liquid metals. R. Turner, E. D. Crozier, and J. F. Cochran, 2735.
Cunsolo, S.
Collision-induced absorption of H_2 and He–A mixtures near $\lambda = 1$ mm. S. Cunsolo and H. P. Gush, 2058.
Curzon, F. L.
A capacitive Fourier analyzer of hydrodynamic surface waves. F. L. Curzon and B. L. Langille, 73.
Nonlinear effects in resonantly driven surface waves on fluids. F. L. Curzon and G. N. Ionides, 2235.
Nonlinear interactions of waves on shallow water. G. N. Ionides and F. L. Curzon, 2698.
The resonant Faraday effect. D. M. Camm and F. L. Curzon, 2866.
Dagg, I. R.
Microwave phase measurements associated with the Goos–Hänchen shift. L. A. A. Read, I. R. Dagg, and G. E. Reesor, 52.
Dielectric loss measurements on nonpolar liquids in the microwave region from 18 to 37 GHz. I. R. Dagg and G. E. Reesor, 2397.
Dalby, F. W.
Zero-field level crossing in the helium atom. C. W. T. Chien, R. E. Bardsley, and F. W. Dalby, 116.
Zero-field level crossing in excited states of molecular hydrogen. J. van der Linde and F. W. Dalby, 287.
Daly, P. W.
The magnetic moment of ^{59}Fe. P. W. Daly, R. L. A. Gorling, P. W. Martin, and B. G. Turrell, 2273.
Darewych, J. W.
Comparison of plane-wave approximations in potential scattering. J. R. Ebden and J. W. Darewych, 1030.
Das, M. P.
Electronic structure of disordered binary alloys: α-brass. M. P. Das and S. K. Joshi, 2856.
Datars, W. R.
Pseudopotential calculations of the band structure and Fermi surface of mercury. J. C. Jones and W. R. Datars, 1659.
Magnetic field dependence of induced torque in copper. W. R. Datars and F. W. Holroyd, 2760.
Davies, W. E. R.
Measurement of temperature and density in the upper atmosphere using an electron beam. J. H. de Leeuw and W. E. R. Davies, 1044.
Davis, H. T.
Numerical study of nonequilibrium diagram theory. G. R. Dowling and H. T. Davis, 317.
Dawson, P. H.
Vibrational energy transfer in carbon monoxide. P. H. Dawson and W. G. Tam, 889.
Dawson, W. K.
Levels of ^{33}Cl via the ^{32}S(d,n)^{33}Cl reaction. S. A. Elbakr, C. Glavina, W. K. Dawson, V. K. Gupta, W. J. McDonald, and G. C. Neilson, 674.
DeBlonde, G.
Anomalous annihilation of positrons in several solid hydrocarbons. G. DeBlonde, S. Y. Chuang, B. G. Hogg, D. P. Kerr, and D. M. Miller, 1619.
Deckers, J. M.
Dimer concentrations in supersonic free jets. R. M. Yealland, J. M. Deckers, I. D. Scott, and C. T. Tuori, 2464.

de Leeuw, J. H.
Measurement of temperature and density in the upper atmosphere using an electron beam. J. H. de Leeuw and W. E. R. Davies, 1044.
Delisle, C.
Détermination de la surface de cohérence à partir d'une expérience de photocomptage. J. Bures, C. Delisle et A. Zardecki, 760.
Théorie exacte de la distribution de la somme des photoélectrons émis en L points. J. Bures, C. Delisle et A. Zardecki, 1307.
Nouvelle méthode de mesure de la visibilité de la modulation spectrale pour de grandes différences de marche. C. Delisle et M. Brochu, 1993.
Desai, R. C.
Kinetic models and Brillouin scattering in a molecular gas. C. D. Boley, R. C. Desai, and G. Tenti, 2158.
Deshpande, V. K.
A rotational flow for the study of rotations of deformed even–even nuclei. V. R. Prakash, B. M. Bahal, and V. K. Deshpande, 2957.
Diamond, W. T.
Resonances in the $^{15}N(\alpha,\gamma)^{19}F$ reaction between $E_\alpha = 1.68$ and 2.72 MeV. D. W. O. Rogers, R. P. Beukens, and W. T. Diamond, 2428.
Dickinson, A. S.
Comment on paper by T. Tietz: Potential-energy function for diatomic molecules. A. S. Dickinson, 3206.
Dimoff, K.
Shock relaxation in a lightly mass-loaded gas. K. Dimoff, P. R. Smy, and J. Lacoste, 1040.
d'Incan, J.
Nouvelles transitions électroniques attribuées à la molécule LuH. J. d'Incan, C. Effantin et R. Bacis, 1810.
Analyse rotationnelle des états $C^2\Delta$ et $D^2\Sigma^-$ de AsO: perturbations de l'état C. J. P. Goure, J. Figuet, J. N. Massot et J. d'Incan, 1926.
Dionne, G. F.
Comments on paper by A. Manoogian: Interpretation of Ti^{3+} electron spin resonance spectra in alums. F. Dionne, 2232.
Ditzian, R. V.
Dynamical properties of the three-dimensional XY model. R. V. Ditzian and D. D. Betts, 129.
Donaldson, F. G.
Vacuum ultraviolet excitation of H($2p$) by electron impact on H_2. J. W. McConkey and F. G. Donaldson, 2211.
Dosso, H. W.
Horizontal magnetic dipole embedded in a two-layer conducting medium. V. Ramaswamy, H. W. Dosso, and J. T. Weaver, 607.
Douglas, D. G.
Use of ^{155}Eu in the measurement of Gd L subshell yields. D. G. Douglas, 1697.
Dowling, G. R.
Numerical study of nonequilibrium diagram theory. G. R. Dowling and H. T. Davis, 317.
Drake, G. W. F.
Helium quench radiation and transition polarizability. G. W. F. Drake, 1896.
Drew, M. S.
On conformally covariant spinor field equations. M. S. Drew, 2100.
Dubois, I.
New electronic transitions of SiO. R. Cornet and I. Dubois, 630.
Duckworth, H. E.
Precise atomic-mass differences in the region $59 \leqslant Z \leqslant 69$. R. C. Barber, R. L. Bishop, J. O. Meredith, F. C. G. Southon, P. Williams, H. E. Duckworth, and P. Van Rookhuyzen, 34.
Dudley, D. G.
Multi-modal transient excitation effects in an infinite, parallel-plate wave guide. D. G. Dudley and J. P. Quintenz, 2826.
Duffill, C.
The mean square force on ions in liquid rubidium. P. A. Egelstaff, D. I. Page, and C. Duffill, 3062.
Duley, W. W.
Interaction of CO_2 laser radiation with solids. II. Drilling of fused quartz. W. W. Duley and J. N. Gonsalves, 216.
Dunlop, P. J.
The concentration dependences of the binary diffusion coefficients of the systems H_2–Ne, D_2–Ne, H_2–N_2, D_2–N_2, H_2–Ar, and D_2–Ar at 1 atm pressure and 300 K. K. R. Harris, T. N. Bell, and P. J. Dunlop, 1644.
Dunn, E. M.
Violet electronic emission of SiN. E. M. Dunn and T. M. Dunn, 860.
Dunn, T. M.
Violet electronic emission of SiN. E. M. Dunn and T. M. Dunn, 860.
Dutton, D. H.
Crystal dynamics of platinum by inelastic neutron scattering. D. H. Dutton, B. N. Brockhouse, and A. P. Miiller, 2915.
Ebden, J. R.
Comparison of plane-wave approximations in potential scattering. J. R. Ebden and J. W. Darewych, 1030.

Effantin, C.
Nouvelles transitions électroniques attribuées à la molécule LuH. J. d'Incan, C. Effantin et R. Bacis, 1810.
Egelstaff, P. A.
Experimental data concerning the quadruplet correlation function of simple liquids. P. A. Egelstaff and S. S. Wang, 684.
Density dependent potentials in simple liquids. P. A. Egelstaff and S. S. Wang, 2461.
The mean square force on ions in liquid rubidium. P. A. Egelstaff, D. I. Page, and C. Duffill, 3062.
Einarsson, O.
Electromagnetic waves on a conducting infinite cylinder in a magnetoionic medium. O. Einarsson, 1315.
Eisenberg, J. M.
Higher-order corrections to the optical potential for kaonic atoms. J. M. Eisenberg and R. Guy, 57.
Elbakr, S. A.
Levels of ^{33}Cl via the ^{32}S(d,n)^{33}Cl reaction. S. A. Elbakr, C. Glavina, W. K. Dawson, V. K. Gupta, W. J. McDonald, and G. C. Neilson, 674.
Elbel, M.
Erratum: Collisional depolarization of light alkali atoms excited to their lowest ^2P levels. M. Elbel, 66.
Elliott, R. V.
Band structure in ^{21}Ne. A. A. Pilt, R. H. Spear, R. V. Elliott, D. T. Kelly, J. A. Kuehner, G. T. Ewan, and C. Rolfs, 1286.
Ellis, D.
Binding energy of neutron star matter. D. Ellis and D. W. L. Sprung, 2277.
Emond, A.
Détermination du champ de vitesse du sillage d'une sphère hypersonique à l'aide de peignes de sondes ioniques. L. Sévigny, D. Heckman et A. Emond, 1842.
Evans, L.
Diagonal and off-diagonal hyperfine structure in the ground multiplets of boron and aluminum by the atomic beam method; magnetic dipole radial parameters. J. S. M. Harvey, L. Evans, and H. Lew, 1719.
Evetts, J. E.
Flux line pinning by large normal particles in Type-II superconductors. R. I. Coote, J. E. Evetts, and A. M. Campbell, 421.
Ewan, G. T.
Band structure in ^{21}Ne. A. A. Pilt, R. H. Spear, R. V. Elliott, D. T. Kelly, J. A. Kuehner, G. T. Ewan, and C. Rolfs, 1286.
The lifetimes of the $3/2^+$, 975 keV level in ^{25}Mg and the $3/2^+$, 945 keV level in ^{25}Al. T. K. Alexander, O. Häusser, A. B. McDonald, and G. T. Ewan, 2198.
Féménias, J. L.
Analyse rotationnelle de la bande (0, 0) du système orange de ScO. R. Stringat, C. Athénour, et J. L. Féménias, 395.
Fertuck, L.
Computing salinity profiles in ice. L. Fertuck, J. W. Spyker, and W. H. W. Husband, 264.
Figuet, J.
Analyse rotationnelle des états $C^2\Delta$ et $D^2\Sigma^-$ de AsO: perturbations de l'état C. J. P. Goure, J. Figuet, J. N. Massot et J. d'Incan, 1926.
Filipow, L.
A test of scaling theory on the critical isotherm. D. D. Betts and L. Filipow, 3117.
Flannery, M. R.
Excitation and ionization of hydrogen by hydrogen-atom impact. M. R. Flannery, 61.
Fletcher, R.
The resistivity and thermopower of a series of Ni–Fe Invar alloys. B. E. Armstrong and R. Fletcher, 244.
Flint, R. W.
Variation with zenith angle of the integral intensity of muons near sea level. R. W. Flint, R. B. Hicks, and S. Standil, 843.
Fortin, E.
Oscillatory spectral distribution of the photoelectromagnetic effect associated with direct interband transitions in germanium. A. Barbarie and E. Fortin, 1593.
Photoconductivité extrinsèque dans le GaAs. F. Prat et E. Fortin, 2551.
Fortin, R.
Double-discharge TEA laser beams. R. Fortin, A. K. Laflamme, and F. Rheault, 582.
Selection of a single pulse from a mode-locked TEA CO_2 laser. F. Rheault, J. L. Lachambre, J. Gilbert, R. Fortin, and M. Blanchard, 1876.
Dynamics of the CO_2 atmospheric pressure laser with transverse pulse excitation. J. Gilbert, J. L. Lachambre, F. Rheault, and R. Fortin, 2523.
Fowlis, D. C.
Antiferromagnetic resonance in $Mn_2P_2O_7$. D. C. Fowlis and C. V. Stager, 2581.
Fraga, S.
Electron spin–spin contact interaction and mass-variation and Darwin relativistic corrections in isoelectronic series. B. W. N. Lo, K. M. S. Saxena, and S. Fraga, 42.
Complete electron spin–spin contact interaction in atoms with f^n configurations. K. M. S. Saxena, B. W. N. Lo, and S. Fraga, 870.
Properties and interactions of lanthanides: interactions with external fields. K. M. S. Saxena and S. Fraga, 1411.

Frank, B.
Solution of an infinite set of Green-function equations for a trapped electron. B. Frank and C. Y. Cheung, 573.
Frindt, R. F.
Critical currents in $NbSe_2$: evidence for surface pinning. J. Kopp, D. J. Huntley, and R. F. Frindt, 2840.
Frood, D. G.
Langmuir probes in plasma with anisotropic velocity distributions. H. Tokutaka and D. G. Frood, 410.
Gabel, D. E.
Gantmakher–Kaner effect in gallium single crystals. D. E. Gabel and J. F. Cochran, 863.
Gallmann, A.
Mesures de rapports d'embranchement et de vies moyennes dans ^{30}Si. A. Gallmann, F. Haas et M. Toulemonde, 278.
Gattinger, R. L.
Quantitative spectroscopy of the aurora. I. The spectrum of bright aurora between 7000 and 9000 Å at 7.5 Å resolution. A. Vallance Jones and R. L. Gattinger, 1833.
Gaucher, R. E.
The ^{154}Eu → ^{154}Gd decay. T. S. Nagpal and R. E. Gaucher, 2688.
Gaultier, D.
Etat stationnaire dans des plasmas CO_2–N_2, CO_2–He et CO_2–N_2–He produits par décharge électrique. D. Bailly, D. Gaultier, C. Rossetti et P. Barchewitz, 2605.
Gautam, M. S.
A note on the spectrum of Se IV. M. S. Gautam and Y. N. Joshi, 2059.
Geiger, J. S.
Level structure of ^{171}Tm. R. L. Graham, J. S. Geiger, and M. W. Johns, 513.
Half-life of the ^{194}Ir decay. J. S. Geiger, 1480.
Low-lying positive-parity states in ^{101}Tc. W. B. Cook, M. W. Johns, J. S. Geiger, and R. L. Graham, 1511.
Measurement of stopping powers for ^{4}He, ^{16}O, and ^{35}Cl ions at ~1 to ~3 MeV per nucleon in Ni, Ge, Y, Ag, and Au. D. Ward, R. L. Graham, and J. S. Geiger, 2302.
Geldart, D. J. W.
Mössbauer effect study of the hyperfine fields at the tin sites in Cu_2MnSn, Ni_2MnSn, and Pd_2MnSn. D. J. W. Geldart, C. C. M. Campbell, P. J. Pothier, and W. Leiper, 206.
Gellie, R. W.
Photoneutron cross sections in ^{14}N. R. W. Gellie, K. H. Lokan, N. K. Sherman, R. G. Johnson, and J. I. Lodge, 1689.
Gerson, N. C.
Ray tracing over a transequatorial path. N. C. Gerson, 976.
Gibb, A. W.
Reorientation measurement in ^{56}Fe. J. A. Cameron, A. W. Gibb, T. Taylor, and Z. Zámori, 475.
Gibbs, B. W.
Strong-field electromagnetic wave interaction with anisotropic plasmas. M. P. Bachynski and B. W. Gibbs, 826.
Pulse distortion by anisotropic plasmas. M. P. Bachynski and B. W. Gibbs, 1221.
Gien, T. T.
Study of the conditions set by unitarity and time-reversal invariance in the ρ–ω mixing with the three-body mixing formalism. T. T. Gien, 3198.
Gilbert, J.
Levels of ^{33}Cl via the ^{32}S(d,n)^{33}Cl reaction. S. A. Elbakr, C. Glavina, W. K. Dawson, V. K. Gupta, W. J. McDonald, and G. C. Neilson, 674.
Selection of a single pulse from a mode-locked TEA CO_2 laser. F. Rheault, J. L. Lachambre, J. Gilbert, R. Fortin, and M. Blanchard, 1876.
Dynamics of the CO_2 atmospheric pressure laser with transverse pulse excitation. J. Gilbert, J. L. Lachambre, F. Rheault, and R. Fortin, 2523.
Glyde, H. R.
On the ground state of b.c.c. ^{3}He. H. R. Glyde and F. C. Khanna, 1143.
Anharmonic phonons in b.c.c. ^{4}He. H. R. Glyde and F. C. Khanna, 1152.
Gonsalves, J. N.
Interaction of CO_2 laser radiation with solids. II. Drilling of fused quartz. W. W. Duley and J. N. Gonsalves, 216.
Gorling, R. L. A.
The magnetic moment of ^{59}Fe. P. W. Daly, R. L. A. Gorling, P. W. Martin, and B. G. Turrell, 2273.
Gould, A. G.
Calculations of angular distributions from metals using positron wave functions with proper crystal symmetry. A. G. Gould, R. N. West, and B. G. Hogg, 2294.
Study of single crystals of magnesium and zinc by positron annihilation. E. H. Becker, E. M. D. Senicki, A. G. Gould, and B. G. Hogg, 2520.
Goure, J. P.
Analyse rotationnelle des états $C^2\Delta$ et $D^2\Sigma^-$ de AsO: perturbations de l'état C. J. P. Goure, J. Figuet, J. N. Massot et J. d'Incan, 1926.

Graham, R. L.
Level structure of ^{171}Tm. R. L. Graham, J. S. Geiger, and M. W. Johns, 513.
Low-lying positive-parity states in ^{101}Tc. W. B. Cook, M. W. Johns, J. S. Geiger, and R. L. Graham, 1511.
Measurement of stopping powers for ^{4}He, ^{16}O, and ^{35}Cl ions at $\sim$1 to $\sim$3 MeV per nucleon in Ni, Ge, Y, Ag, and Au. D. Ward, R. L. Graham, and J. S. Geiger, 2302.
Gray, A. L.
Photon correlation spectroscopy using a Digital PDP-9 computer. F. R. Hallett, A. L. Gray, A. Rybakowski, J. L. Hunt, and J. R. Stevens, 2368.
Gray, R. B.
Studies on a microwave dragging technique for measuring electron drift velocity. R. B. Gray and V. Makios, 2073.
Gregory, B. C.
The transition from free-fall to ambipolar diffusion in the mercury afterglow plasma. C. R. Roque and B. C. Gregory, 1436.
Gregory, P. R.
The decay of ^{117}Cd and ^{117}Cd^{m}. P. R. Gregory and M. W. Johns, 2012.
Gregov, B.
Field-ion microscopy of tungsten bombarded by low-energy argon ions. B. Gregov and R. P. W. Lawson, 791.
Grindlay, J.
Equilibrium ion spacing and ion-pair electrostatic energy for a finite ionic crystal with NaCl structure: point-ion model. C. C. Huang and J. Grindlay, 2715.
The electrostatic potential in a finite ionic crystal. A. Redlack and J. Grindlay, 2815.
Groce, D. E.
(e^{+}, He) total scattering. D. G. Costello, D. E. Groce, D. F. Herring, and J. Wm. McGowan, 23.
Guenebaut, H.
Spectre d'émission de la molécule PO: transition $C^2\Sigma^- - X^2\Pi_r$ et nature de l'état C'. B. Coquart, C. Couet, H. Guenebaut, M. Larzillière et T. A. Ngo, 1014.
Rotational analysis of bands of the $\tilde{A}^2A_1$–$\tilde{X}^2B_1$ transition of PH_2. J. M. Berthou, B. Pascat, H. Guenebaut, and D. A. Ramsay, 2265.
Guha, S.
Emission spectrum of the PO molecule. Part III. Spectrum in the red region. S. Guha, S. Jois, and R. D. Verma, 1579.
Gupta, B. K.
Anisotropy in the Dicke narrowing of rotational Raman lines (A new measure of the nonsphericity of intermolecular forces). B. K. Gupta, S. Hess, and A. D. May, 778.
Dicke narrowing and collision broadening of the depolarized Rayleigh and S_0 (1) Raman line in the hydrogen isotopes and H_2–He, H_2–Ne mixtures. B. K. Gupta and A. D. May, 1747.
Gupta, V. K.
Levels of ^{33}Cl via the ^{32}S(d,n)^{33}Cl reaction. S. A. Elbakr, C. Glavina, W. K. Dawson, V. K. Gupta, W. J. McDonald, and G. C. Neilson, 674.
Guptill, E. W.
Force between metal plates arising from the contact potential. E. W. Guptill, M. G. Calkin, and M. H. Jericho, 2967.
Gush, H. P.
Spectrum of the airglow between 3 and 4 microns. F. E. Bunn and H. P. Gush, 213.
Collision-induced absorption of H_2 and He–A mixtures near $\lambda = 1$ mm. S. Cunsolo and H. P. Gush, 2058.
Guy, R.
Higher-order corrections to the optical potential for kaonic atoms. J. M. Eisenberg and R. Guy, 57.
Haas, F.
Mesures de rapports d'embranchement et de vies moyennes dans ^{30}Si. A. Gallmann, F. Haas et M. Toulemonde, 278.
Hajkowicz, L. A.
Studies of ionospheric inhomogeneities using phase interferometry of satellite beacon transmissions at 136.410 MHz. L. A. Hajkowicz, 336.
Wavelike structure of magnetic field-aligned irregularities detected by phase interferometry. L. A. Hajkowicz, 2654.
Halevi, P.
Drude theory of electromagnetic waves in an inclined magnetic field. I. One-band model of charge carriers. P. Halevi, 1600.
Hall, R. L.
Gaussian wave functions and the many-body problem. R. L. Hall, 305.
Hallett, F. R.
Photon correlation spectroscopy using a Digital PDP-9 computer. F. R. Hallett, A. L. Gray, A. Rybakowski, J. L. Hunt, and J. R. Stevens, 2368.
Hara, E. H.
Rayleigh–Brillouin scattering in compressed H_2, D_2, and HD. II. E. H. Hara and A. D. May, 1227.
Hare, M. G.
Mass radius of the nucleon. M. G. Hare and G. Papini, 1163.
Harris, K. R.
The concentration dependences of the binary diffusion coefficients of the systems H_2–Ne, D_2–Ne, H_2–N_2, D_2–N_2, H_2–Ar, and D_2–Ar at 1 atm pressure and 300 K. K. R. Harris, T. N. Bell, and P. J. Dunlop, 1644.

Harrison, A. W.
Spectrophotometry of the aurora. A. W. Harrison, 500.
Hart, L. G.
Fluctuations in drift velocity of high-field domains in *n*-GaAs. L. G. Hart, 617.
Hartford, A., Jr.
Zeeman effect in the 2782 Å band of HCP. J. G. Moehlmann, A. Hartford, Jr., and J. R. Lombardi, 1705.
Harvey, J. S. M.
Diagonal and off-diagonal hyperfine structure in the ground multiplets of boron and aluminum by the atomic beam method; magnetic dipole radial parameters. J. S. M. Harvey, L. Evans, and H. Lew, 1719.
Häusser, O.
The lifetimes of the $3/2^+$, 975 keV level in ^{25}Mg and the $3/2^+$, 945 keV level in ^{25}Al. T. K. Alexander, O. Häusser, A. B. McDonald, and G. T. Ewan, 2198.
Heckman, D.
Détermination du champ de vitesse du sillage d'une sphère hypersonique à l'aide de peignes de sondes ioniques. L. Sévigny, D. Heckman et A. Emond, 1842.
Structure of turbulent wakes of hypersonic spheres as inferred with ion probes. D. Heckman and L. Sévigny, 2776.
Ion density measurements in the wake of a hypersonic sphere. L. Sévigny, D. Heckman, and P. Caron, 2970.
Hede, B. B. J.
Spin-up-spin-down pair distribution function at metallic densities. B. B. J. Hede and J. P. Carbotte, 1756.
Hedgcock, F. T.
Analysis of wide Lorentzian-shaped electron spin resonance lines. F. T. Hedgcock and T. W. Raudorf, 579.
Heinrich, B.
Domain configurations, Bloch walls, and magnetization processes in iron whiskers from D.C. to 200 kHz. Theory and experiment. I. B. Heinrich and A. S. Arrott, 710.
Hemming, D.
Far-infrared absorption in bulk samples of superconducting d-h.c.p. lanthanum. L. W. Kry and D. Hemming, 2549.
Henry, L. C.
Total pair production cross sections from 1.120 to 2.754 MeV. L. C. Henry and T. J. Kennett, 2756.
Hernández, R.
Quantum-field theoretic analysis of paramagnetic spin–lattice relaxation. R. Hernández and M. B. Walker, 440.
Herring, D. F.
(e^+, He) total scattering. D. G. Costello, D. E. Groce, D. F. Herring, and J. Wm. McGowan, 23.
Hess, S.
Anisotropy in the Dicke narrowing of rotational Raman lines (A new measure of the nonsphericity of intermolecular forces). B. K. Gupta, S. Hess, and A. D. May, 778.
Hewson, P. W.
On the interaction of positrons with argon. P. W. Hewson, G. Jones, and E. W. Vogt, 821.
Hicks, R. B.
Variation with zenith angle of the integral intensity of muons near sea level. R. W. Flint, R. B. Hicks, and S. Standil, 843.
Hill, D. A.
Electromagnetic scattering of a small spherical obstacle near the ground. D. A. Hill and J. R. Wait, 237.
Hodges, C. H.
Umklapp annihilation of positronium in crystals. C. H. Hodges, B. T. A. McKee, W. Triftshäuser, and A. T. Stewart, 103.
Hodgson, R. J. W.
Solution of the Bethe–Goldstone equation in finite nuclei from N–N phase shift data. R. J. W. Hodgson, 940.
Hogg, B. G.
Anomalous annihilation of positrons in several solid hydrocarbons. G. DeBlonde, S. Y. Chuang, B. G. Hogg, D. P. Kerr, and D. M. Miller, 1619.
Calculations of angular distributions from metals using positron wave functions with proper crystal symmetry. A. G. Gould, R. N. West, and B. G. Hogg, 2294.
Study of single crystals of magnesium and zinc by positron annihilation. E. H. Becker, E. M. D. Senicki, A. G. Gould, and B. G. Hogg, 2520.
Holden, T. M.
Spin-wave excitations in manganese carbonate. T. M. Holden, E. C. Svensson, and P. Martel, 687.
Holmes, R. W.
Magnetogasdynamic aligned flows with finite electric conductivity. O. P. Chandna and R. W. Holmes, 1273.
Holroyd, F. W.
Magnetic field dependence of induced torque in copper. W. R. Datars and F. W. Holroyd, 2760.
Howard, M.
Microscopic theory of tunneling anomalies. Hamann's approximation. M. Howard and A. D. S. Nagi, 2587.
Hrycyshyn, E. S.
Sensitized fluorescence in vapors of alkali atoms. XIII. $6^2P_{1/2}$–$6^2P_{3/2}$ excitation transfer in rubidium, induced in collisions with noble gas atoms. I. Siara, E. S. Hrycyshyn, and L. Krause, 1826.

Huang, C. C.
Equilibrium ion spacing and ion-pair electrostatic energy for a finite ionic crystal with NaCl structure: point-ion model. C. C. Huang and J. Grindlay, 2715.
Hume, W. D.
Response time of the magnetosphere to the interplanetary electric field. G. Rostoker, H.-L. Lam, and W. D. Hume, 544.
Hung, N. T.
Circularly polarized waves in magnetoplasmas containing negative ions. N. T. Hung and G. Paquette, 2111.
Hunt, J. L.
Photon correlation spectroscopy using a Digital PDP-9 computer. F. R. Hallett, A. L. Gray, A. Rybakowski, J. L. Hunt, and J. R. Stevens, 2368.
Hunter, J. D.
Surface current density on perfectly conducting polygonal cylinders. J. D. Hunter, 139.
Huntley, D. J.
Critical currents in $NbSe_2$: evidence for surface pinning. J. Kopp, D. J. Huntley, and R. F. Frindt, 2840.
Husband, W. H. W.
Computing salinity profiles in ice. L. Fertuck, J. W. Spyker, and W. H. W. Husband, 264.
Huschilt, J.
The nuclear 'repulsive-core' effect as a possible consequence of matter in interaction with a classical relativistic scalar field: a new approach to the question. D. Leiter, J. Huschilt, and G. Szamosi, 636.
Hutchison, T. S.
Thermally activated glide in normal and superconducting indium. T. S. Hutchison and S. L. McBride, 64.
Flow stress of normal and superconducting indium. T. S. Hutchison and S. L. McBride, 906.
Flow stress and yield point observations on normal and superconducting indium and lead. T. S. Hutchison and S. L. McBride, 2592.
Imai, M.
Fluctuating properties of Gaussian light beams in an atmosphere. M. Imai, 960.
Inoue, M.
Line shape of *C* bands in alkali halide phosphors by the method of moments. R. Sati, S. Wang, and M. Inoue, 1370.
Ionides, G. N.
Nonlinear effects in resonantly driven surface waves on fluids. F. L. Curzon and G. N. Ionides, 2235.
Nonlinear interactions of waves on shallow water. G. N. Ionides and F. L. Curzon, 2698.
Irish, J. D.
Reactions $^{19}F(\gamma,x\gamma')$ and $^{31}P(\gamma,x\gamma')$. B. J. Thomas, A. Buchnea, J. D. Irish, and K. G. McNeill, 3085.
Irwin, D. J. G.
The complete spectrum of collision-induced light scattering in compressed argon. D. J. G. Irwin and A. D. May, 2174.
Beam–foil studies of oxygen below 2000 Å. C. C. Lin, D. J. G. Irwin, J. A. Kernahan, A. E. Livingston, and E. H. Pinnington, 2496.
Irwin, J. C.
Phonon disperson in ZnSe. J. C. Irwin and J. LaCombe, 2596.
Ishaq, A. F. M.
A study of thermal neutron capture in aluminum. A. F. M. Ishaq, A. H. Colenbrander, and T. J. Kennett, 2845.
A study of thermal neutron capture in chlorine. A. F. M. Ishaq and T. J. Kennett, 3090.
Jackson, M.
Electric quadrupole transitions in Na I, Mg II, and Al III. C. E. Tull, M. Jackson, R. P. McEachran, and M. Cohen, 1169.
Jaduszliwer, B.
Measurement of the total cross sections of positrons on helium atoms in the energy range 15 to 23 eV. B. Jaduszliwer, Wm. C. Keever, and D. A. L. Paul, 1414.
Jain, D. L.
Acoustic diffraction of a plane wave by two coplanar parallel perfectly soft or rigid strips. D. L. Jain and R. P. Kanwal, 928.
Jain, M.
Search for broad resonances in ^3He. S. N. Bunker, M. Jain, C. A. Miller, J. M. Nelson, P. J. Tivin, and W. T. H. van Oers, 1295.
Jakimiw, G.
Weak radiative decays of hyperons in the pole model. E. Yakimiw and G. Jakimiw, 1300.
James, C. R.
Drift instability in plasmas with nonuniform macroscopic rotation profiles. M. Caplan, C. E. Capjack, and C. R. James, 1795.
Jammu, K. S.
Spatially resolved gain measurements in a CO_2 amplifier. A. K. McQuillan, A. T. Carswell, and K. S. Jammu, 769.
Jan, J.-P.
Space groups for Fermi surfaces. J.-P. Jan, 925.
Japar, S. M.
Vibrational analysis of the 2800 Å band system of para-dibromobenzene. S. M. Japar, 1402.

Jay-Gerin, J. P.
Low-temperature thermomagnetic effects in graphite. J. P. Jay-Gerin, 2444.
Jericho, M. H.
Force between metal plates arising from the contact potential. E. W. Guptill, M. G. Calkin, and M. H. Jericho, 2967.
Johns, M. W.
Level structure of ^{171}Tm. R. L. Graham, J. S. Geiger, and M. W. Johns, 513.
Low-lying positive-parity states in ^{101}Tc. W. B. Cook, M. W. Johns, J. S. Geiger, and R. L. Graham, 1511.
Decay of ^{101}Mo and ^{101}Tc. W. B. Cook and M. W. Johns, 1957.
The decay of ^{117}Cd and ^{117}Cd^{m}. P. R. Gregory and M. W. Johns, 2012.
Levels in ^{89}Rb populated by the beta decay of ^{89}Kr. W. F. S. Poehlman, B. Singh, and M. W. Johns, 2741.
Johnson, R. G.
Photoneutron cross sections in ^{14}N. R. W. Gellie, K. H. Lokan, N. K. Sherman, R. G. Johnson, and J. I. Lodge, 1689.
Johnstone, I. P.
Low-lying structure and inelastic scattering of Cu isotopes in a unified model. B. Castel, I. P. Johnstone, B. P. Singh, and K. W. C. Stewart, 1630.
Jois, S.
Emission spectrum of the PO molecule. Part III. Spectrum in the red region. S. Guha, S. Jois, and R. D. Verma, 1579.
Jones, B.
Energies and intensities of γ rays in the decay of ^{79}Sr. I. M. Ladenbauer-Bellis, H. Bakhru, and B. Jones, 3071.
Jones, B. L.
The Stokes' shift in impurity spectral lines. II. Relationship to the adiabatic approximation approach. R. Barrie, I. W. Sharpe, and B. L. Jones, 231.
Jones, G.
On the interaction of positrons with argon. P. W. Hewson, G. Jones, and E. W. Vogt, 821.
Jones, J.
The effect of wind shear gradients on underdense radio meteor decay times. J. Jones and B. A. Read, 1277.
Jones, J. C.
Pseudopotential calculations of the band structure and Fermi surface of mercury. J. C. Jones and W. R. Datars, 1659.
Jones, W. E.
The spectrum of AsF in the near vacuum ultraviolet and near infrared regions. D. S. Liu and W. E. Jones, 1230.
New configurations in triply ionized indium (In IV). K. S. Bhatia, W. E. Jones, and A. M. Crooker, 2421.
Jopko, A. M.
Some extensions of the schematic model for core polarization of the nuclear effective interaction. D. W. L. Sprung and A. M. Jopko, 2768.
Joshi, S. K.
Electronic structure of disordered binary alloys: α-brass. M. P. Das and S. K. Joshi, 2856.
Joshi, Y. N.
A note on the spectrum of Se IV. M. S. Gautam and Y. N. Joshi, 2059.
Jost, A. G. D.
Positron–vacancy interaction in aluminum. B. T. A. McKee, A. G. D. Jost, and I. K. MacKenzie, 415.
Judek, B.
Further study of the anomalous behavior of secondary particles emitted from heavy primary interactions. B. Judek, 2082.
Kalman, C. S.
Total scattering cross sections in two-body strong interactions calculated by an algebraic approach using the group $SU(1,3)$. C. S. Kalman, 481.
Kamal, A. N.
Impact parameter representations. A. N. Kamal, 1862.
Kanwal, R. P.
Acoustic diffraction of a plane wave by two coplanar parallel perfectly soft or rigid strips. D. L. Jain and R. P. Kanwal, 928.
Katsanos, A. A.
Concerning the decay of 2.6 h ^{65}Ni. T. Paradellis and A. A. Katsanos, 2728.
Kean D. C.
A study of levels in ^{25}Mg via the ^{22} Ne$(\alpha,n\gamma)^{25}$Mg reaction. D. C. Kean and R. W. Ollerhead, 1539.
Keever, Wm. C.
Measurement of the total cross sections of positrons on helium atoms in the energy range 15 to 23 eV. B. Jaduszliwer, Wm. C. Keever, and D. A. L. Paul, 1414.
Keller, N. A.
Photoalpha reactions in the region $Z = 22$–$Z = 30$. N. A. Keller and D. B. McConnell, 1554.
Kelly, D. T.
Band structure in ^{21}Ne. A. A. Pilt, R. H. Spear, R. V. Elliott, D. T. Kelly, J. A. Kuehner, G. T. Ewan, and C. Rolfs, 1286.
Kelly R.
Bombardment-induced amorphization in WO_3 and its use in deducing mean damage ranges (Studies on bombardment-induced disorder. VI). N. Q. Lam and R. Kelly, 1887.

Kennett, T. J.
Inelastic neutron scattering in the region $A = 11$–40. L. Nichol and T. J. Kennett, 553.
Fast neutron cross sections in the $2S$–$1D$ shell. G. R. Norman, W. V. Prestwich, and T. J. Kennett, 2385.
Total pair production cross sections from 1.120 to 2.754 MeV. L. C. Henry and T. J. Kennett, 2756.
A study of thermal neutron capture in aluminum. A. F. M. Ishaq, A. H. Colenbrander, and T. J. Kennett, 2845.
A study of thermal neutron capture in chlorine. A. F. M. Ishaq and T. J. Kennett, 3090.
Kernahan, J. A.
Beam–foil studies of oxygen below 2000 Å. C. C. Lin, D. J. G. Irwin, J. A. Kernahan, A. E. Livingston, and E. H. Pennington, 2496.
Kerr, D. P.
Anomalous annihilation of positrons in several solid hydrocarbons. G. DeBlonde, S. Y. Chuang, B. G. Hogg, D. P. Kerr, and D. M. Miller, 1619.
Keszthelyi, L.
The magnetic field at tungsten nuclei in iron. J. A. Cameron, L. Keszthelyi, G. Mezei, Z. Szokefalvi-Nagy, and L. Varga, 739.
Khanna, F. C.
On the ground state of b.c.c. ^{3}He. H. R. Glyde and F. C. Khanna, 1143.
Anharmonic phonons in b.c.c. ^{4}He. H. R. Glyde and F. C. Khanna, 1152.
Kharadly, M. M. Z.
Backscattering of electromagnetic waves from a rough surface model. P. D. O'Kelly and M. M. Z. Kharadly, 2928.
Kim, C. Y.
^{11}B (n,α) ^{8}Li (β^-) ^{8}Be* (2α) reaction for 25 and 38 MeV neutrons. C. Y. Kim, 2674.
Kim, S. M.
Positron annihilation and the band structure in molybdenum. S. M. Kim and W. J. L. Buyers, 1777.
Klein, A.
Number-conserving algebraic method for pairing theory. S. C. Pang and A. Klein, 655.
Knott, T. F.
Critical examination of a proposed charged-particle Stern–Gerlach experiment. T. F. Knott, 185.
Kopp, J.
Critical currents in $NbSe_2$: evidence for surface pinning. J. Kopp, D. J. Huntley, and R. F. Frindt, 2840.
Krause, L.
Sensitized fluorescence in vapors of alkali atoms. XIII. $6^2P_{1/2}$–$6^2P_{3/2}$ excitation transfer in rubidium, induced in collisions with noble gas atoms. I. Siara, E. S. Hrycyshyn, and L. Krause, 1826.
Kreuzer, H. J.
On the geometry of the insulating barrier in thin film tunnel junctions. J. G. Adler and H. J. Kreuzer, 2842.
Krishen, K.
Electromagnetic wave scattering from a layer with a plane interface in front and a rough interface in back (Kirchhoff method). K. Krishen, 431.
Krishna, Mrs.
Dielectric relaxation of alkyl acetates in aromatic and aliphatic solvents at microwave frequencies. G. P. Srivastava, P. C. Mathur, and Mrs. Krishna, 1449.
Krishnamurthy, N.
Second-order Raman spectra of fluorites. I. Critical point analysis. N. Krishnamurthy and V. Soots, 849.
Second-order Raman spectra of fluorites. II. Lattice dynamical analysis. N. Krishnamurthy and V. Soots, 1350.
Kroto, H. W.
Microwave spectrum, structure, and dipole moment of cyanogen azide, NCN_3. C. C. Costain and H. W. Kroto, 1453.
Kry, L. W.
Far-infrared absorption in bulk samples of superconducting d-h.c.p. lanthanum. L. W. Kry and D. Hemming, 2549.
Kuehner, J. A.
Band structure in ^{21}Ne. A. A. Pilt, R. H. Spear, R. V. Elliott, D. T. Kelly, J. A. Kuehner, G. T. Ewan, and C. Rolfs, 1286.
Kwan, C. C. Y.
Conduction band parameters in GaSb from high-temperature transport measurements. J. Basinski, C. C. Y. Kwan, and J. C. Woolley, 1068.
Lachambre, J. L.
Selection of a single pulse from a mode-locked TEA CO_2 laser. F. Rheault, J. L. Lachambre, J. Gilbert, R. Fortin, and M. Blanchard, 1876.
Dynamics of the CO_2 atmospheric pressure laser with transverse pulse excitation. J. Gilbert, J. L. Lachambre, F. Rheault, and R. Fortin, 2523.
LaCombe, J.
Phonon dispersion in ZnSe. J. C. Irwin and J. LaCombe, 2596.
Lacome, N.
Spectroscopie par source laser. I. Etude expérimentale des intensités et largeurs des raies de la transition 00^01–$(10^00,02^00)_I$ de CO_2. E. Arié, N. Lacome et C. Rossetti, 1800.

Spectroscopie par source laser. II. Etude expérimentale de l'élargissement des raies de la transition $00^01-(10^00, 02^00)_1$ de CO_2 perturbé par N_2. Application de la théorie d'Anderson, Tsao et Curnutte au calcul des largeurs des raies de CO_2 pur, et perturbé par N_2. C. Boulet, E. Arié, J. P. Bouanich et N. Lacome, 2178.

Lacoste, J.
Shock relaxation in a lightly mass-loaded gas. K. Dimoff, P. R. Smy, and J. Lacoste, 1040.

Ladenbauer-Bellis, I. M.
Energies and intensities of γ rays in the decay of ^{79}Sr. I. M. Ladenbauer-Bellis, H. Bakhru, and B. Jones, 3071.

Laflamme, A. K.
Double-discharge TEA laser beams. R. Fortin, A. K. Laflamme, and F. Rheault, 582.

Lakshminarayana, V.
Transition probabilities of the 35.5, 428, and 463 keV transitions in ^{125}Te. G. Satyanarayana, V. Lakshminarayana, and D. S. Murty, 600.

Lalović, D. I.
Theory of biexcitons. M. Božić-Popović, D. I. Lalović, B. S. Tošić, and R. B. Žakula, 898.

Lam, C. S.
Geometric-mean wave function for HeH^{2+}. C. S. Lam and Y. P. Varshni, 666.

Lam, H.-L.
Response time of the magnetosphere to the interplanetary electric field. G. Rostoker, H.-L. Lam, and W. D. Hume, 544.

Lam, N. Q.
Bombardment-induced amorphization in WO_3 and its use in deducing mean damage ranges (Studies on bombardment-induced disorder. VI). N. Q. Lam and R. Kelly, 1887.

Langille, B. L.
A capacitive Fourier analyzer of hydrodynamic surface waves. F. L. Curzon and B. L. Langille, 73.

Larzillière, M.
Spectre d'émission de la molécule PO: transition $C^2\Sigma^- - X^2\Pi_r$ et nature de l'état C'. B. Coquart, C. Couet, H. Guenebaut, M. Larzillière et T. A. Ngo, 1014.
Spectre d'émission de la molécule PO: la transition $E^2\Delta - X^2\Pi_r$; étude de l'état Rydberg $E^2\Delta$. B. Coquart, M. Larzillière et T. A. Ngo, 2945.

Lass, J. S.
Negative magnetoresistance in semiconductors with overlapping impurity and conduction bands. J. S. Lass, 1650.

Laubitz, M. J.
High-temperature transport properties of palladium. M. J. Laubitz and T. Matsumura, 196.
Thermal and electrical conductivities of sodium from 40 to 360 K. J. G. Cook, M. P. Van der Meer, and M. J. Laubitz, 1386.

Law, A. K.
A kinetic interpretation of sound absorption in mixtures of argon and nitrogen. A. K. Law and D. S. Bezanson, 1764.

Law, J.
Inner shell vacancy creation in the beta decays of ^{147}Pm and ^{185}W. J. L. Campbell and J. Law, 2451.

Lawson, R. P. W.
Field-ion microscopy of tungsten bombarded by low-energy argon ions. B. Gregov and R. P. W. Lawson, 791.

Leavens, C. R.
Pressure dependence of the energy gap anisotropy in aluminum. C. R. Leavens and J. P. Carbotte, 2568.

Lee, C.
Longitudinal magnetoresistance in gallium at 20.3 °K. J. Yahia and C. Lee, 858.

Lee, P.
The absence of the dip in backward π^+ photoproduction using a narrow resonance model. P. Lee, 2647.

Lefebvre-Brion, H.
Calculated Rydberg states of the PO molecule. F. Ackermann, H. Lefebvre-Brion, and A. L. Roche, 692.

Leibbrandt, G.
Dependence of massive superpropagators on the strong and weak gravitational coupling constants. G. Leibbrandt, 2391.

Leiper, W.
Mössbauer effect study of the hyperfine fields at the tin sites in Cu_2MnSn, Ni_2MnSn, and Pd_2MnSn. D. J. W. Geldart, C. C. M. Campbell, P. J. Pothier, and W. Leiper, 206.

Leiter, D.
The nuclear 'repulsive-core' effect as a possible consequence of matter in interaction with a classical relativistic scalar field: a new approach to the question. D. Leiter, J. Huschilt, and G. Szamosi, 636.

Lerner-Naor, M.
Quantum-mechanical theory of orientational ordering in solid methanes. S. Alexander and M. Lerner-Naor, 1568.

Le Roy, R. J.
Dependence of the diatomic rotational constant B_r on the long-range internuclear potential. R. J. Le Roy, 953.

Lew, H.
Diagonal and off-diagonal hyperfine structure in the ground multiplets of boron and aluminum by the atomic beam method; magnetic dipole radial parameters. J. S. M. Harvey, L. Evans, and H. Lew, 1719.

Lewis, J. C.
Theory of intercollisional interference effects. I. Induced absorption in a Lorentz gas. J. C. Lewis and J. Van Kranendonk, 352.
Theory of intercollisional interference effects. II. Induced absorption in a real gas. J. C. Lewis, 2881.
Theory of intercollisional interference effects. III. Collision-induced light scattering. J. C. Lewis and J. Van Kranendonk, 2902.
Lichtenberger, P. C.
Analysis of counting distributions with a complex exponential character. P. C. Lichtenberger, J. R. Stevens, and T. D. Newton, 345.
Lidsky, L. M.
Identification of transverse Kelvin–Helmholtz turbulence in a magnetoplasma column. J. E. Robinson and L. M. Lidsky, 1782.
Lim, C. C.
An examination of the relationship between sound velocity and density in liquids. R. A. Aziz, D. H. Bowman, and C. C. Lim, 646.
Bulk modulus in polycrystalline inert gas solids at 0 K. R. A. Aziz, D. H. Bowman, and C. C. Lim, 2027.
Lin, C. C.
Beam–foil studies of oxygen below 2000 Å. C. C. Lin, D. J. G. Irwin, J. A. Kernahan, A. E. Livingston, and E. H. Pinnington, 2496.
Linton, C.
A new $^1\Delta$–$^1\Delta$ transition of the TiO molecule. C. Linton, 312.
Lit, J. W. Y.
Field of a truncated Gaussian beam as given by the boundary-diffraction-wave theory. R. Boulay and J. W. Y. Lit, 259.
Characteristic parameters of a beam with a Gaussian irradiance distribution. J. W. Y. Lit and R. Boulay, 301.
Litherland, A. E.
The $5/2^-$ resonance at 850 keV in $^{15}N(\alpha,\gamma)^{19}F$. D. W. O. Rogers, J. H. Aitken, and A. E. Litherland, 268.
Properties of the 612 keV resonance in the $^{27}Al(p,\gamma)^{28}Si$ reaction. N. Anyas-Weiss, A. E. Litherland, and P. J. M. Smulders, 1949.
Liu, D. S.
The spectrum of AsF in the near vacuum ultraviolet and near infrared regions. D. S. Liu and W. E. Jones, 1230.
Livingston, A. E.
Beam–foil studies of oxygen below 2000 Å. C. C. Lin, D. J. G. Irwin, J. A. Kernahan, A. E. Livingston, and E. H. Pinnington, 2496.
Lo, B. W. N.
Electron spin–spin contact interaction and mass-variation and Darwin relativistic corrections in isoelectronic series. B. W. N. Lo, K. M. S. Saxena, and S. Fraga, 42.
Complete electron spin–spin contact interaction in atoms with f^n configurations. K. M. S. Saxena, B. W. N. Lo, and S. Fraga, 870.
Lodge, J. I.
Photoneutron cross sections in ^{14}N. R. W. Gellie, K. H. Lokan, N. K. Sherman, R. G. Johnson, and J. I. Lodge, 1689.
Logan, R. K.
Possible difficulties with u-channel exchange degeneracy. R. K. Logan, 529.
Exchange degeneracy and duality in a generalized interference model. R. K. Logan, 2033.
Lokan, K. H.
Photoneutron cross sections in ^{14}N. R. W. Gellie, K. H. Lokan, N. K. Sherman, R. G. Johnson, and J. I. Lodge, 1689.
Lombardi, J. R.
Zeeman effect in the 2782 Å band of HCP. J. G. Moehlmann, A. Hartford, Jr., and J. R. Lombardi, 1705.
Love, L. E. G.
Magnetic levitation: linear synchronous motor efficiency. D. L. Atherton, L. E. G. Love, and P. O. Prentiss, 3143.
Lowe, L. M.
Quadrupole interaction of ^{181}Ta in hafnium oxychloride. H. Zmora, L. M. Lowe, and W. V. Prestwich, 2054.
Lowe, R. P.
Measurements of stratospheric methane over North America. R. P. Lowe and D. McKinnon, 668.
Lynch, G. F.
Nuclear magnetic resonance and quadrupole coupling in hydrous and anhydrous sodium molybdate and sodium tungstate spinel. G. F. Lynch and S. L. Segel, 567.
MacKenzie, I. K.
Positron–vacancy interaction in aluminum. B. T. A. McKee, A. G. D. Jost, and I. K. MacKenzie, 415.
Maclatchy, C. S.
The formative phase of a low pressure, high voltage Z pinch. C. S. Maclatchy and A. J. Barnard, 2475.
Mahutte, C. K.
On the electronic polarization effect on excitons in insulators. C. K. Mahutte, M. Matsuura, and S. Wang, 375.

Makios, V.
Studies on a microwave dragging technique for measuring electron drift velocity. R. B. Gray and V. Makios, 2073.
Mannik, L.
The ν_1 band of carbon dioxide in pressure-induced absorption. II. Density and temperature dependence of the intensity; critical phenomena. L. Mannik and J. C. Stryland, 1355.
The $(\nu_1, 2\nu_2)$ vibron–phonon infrared absorption band of solid CO_2. L. Mannik and E. J. Allin, 2105.
Martel, P.
Spin-wave excitations in manganese carbonate. T. M. Holden, E. C. Svensson, and P. Martel, 687.
Martin, P. W.
The magnetic moment of ^{59}Fe. P. W. Daly, R. L. A. Gorling, P. W. Martin, and B. G. Turrell, 2273.
Martineau, J.
L'effet de la dynamique d'une impulsion-laser sur le chauffage de plasmas confinés. G. Beaudry et J. Martineau, 594.
Massot, J. N.
Analyse rotationnelle des états $C^2\Delta$ et $D^2\ \Sigma^-$ de AsO: perturbations de l'état C. J. P. Goure, J. Figuet, J. N. Massot et J. d'Incan, 1926.
Mathews, C. K.
Cumulative yields of the heavy fragments in the fast neutron fission of ^{238}U. C. K. Mathews and R. H. Tomlinson, 3100.
Mathur, P. C.
Dielectric relaxation of alkyl acetates in aromatic and aliphatic solvents at microwave frequencies. G. P. Srivastava, P. C. Mathur, and Mrs. Krishna, 1449.
Matsumura, T.
High-temperature transport properties of palladium. M. J. Laubitz and T. Matsumura, 196.
Matsuura, M.
On the electronic polarization effect on excitons in insulators. C. K. Mahutte, M. Matsuura, and S. Wang, 375.
Mattingly, S. R.
Dynamical properties of the three-dimensional XY model. II. Singularity structure of the frequency dependent susceptibility. S. R. Mattingly and D. D. Betts, 2415.
May, A. D.
Structure of the 2^3P–2^3S_1 optical transition of ^{3}He: A study by emission and absorption spectroscopy. R. S. Timsit and A. D. May, 67.
Anisotropy in the Dicke narrowing of rotational Raman lines (A new measure of the nonsphericity of intermolecular forces). B. K. Gupta, S. Hess, and A. D. May, 778.
Rayleigh–Brillouin scattering in compressed H_2, D_2, and HD. II. E. H. Hara and A. D. May, 1227.
Dicke narrowing and collision broadening of the depolarized Rayleigh and $S_0(1)$ Raman line in the hydrogen isotopes and H_2–He, H_2–Ne mixtures. B. K. Gupta and A. D. May, 1747.
The complete spectrum of collision-induced light scattering in compressed argon. D. J. G. Irwin and A. D. May, 2174.
McBride, J. O. P.
The vibration–rotation spectrum of ammonia gas. II. A rotational analysis of the 6450 A band. J. O. P. McBride and R. W. Nicholls, 93.
McBride, S. L.
Thermally activated glide in normal and superconducting indium. T. S. Hutchison and S. L. McBride, 64.
Flow stress of normal and superconducting indium. T. S. Hutchison and S. L. McBride, 906.
Flow stress and yield point observations on normal and superconducting indium and lead. T. S. Hutchison and S. L. McBride, 2592.
McConkey, J. W.
Vacuum ultraviolet excitation of H($2p$) by electron impact on H_2. J. W. McConkey and F. G. Donaldson, 2211.
McConnell, D. B.
Photoalpha reactions in the region $Z = 22$–$Z = 30$. N. A. Keller and D. B. McConnell, 1554.
McDiarmid, D. R.
On the aspect sensitivity of radio aurora. D. R. McDiarmid, 2557.
McDonald, A. B.
The lifetimes of the $3/2^+$, 975 keV level in ^{25}Mg and the $3/2^+$, 945 keV level in ^{25}Al. T. K. Alexander, O. Häuser, A. B. McDonald, and G. T. Ewan, 2198.
McDonald, W. J.
Levels of ^{33}Cl via the ^{32}S(d,n)^{33} Cl reaction. S. A. Elbakr, C. Glavina, W. K. Dawson, V. K. Gupta, W. J. McDonald, and G. C. Neilson, 674.
McEachran, R. P.
Electric quadrupole transitions in Na I, Mg II, and Al III. C. E. Tull, M. Jackson, R. P. McEachran, and M. Cohen, 1169.
Systematic trends in atomic oscillator strengths: the helium isoelectronic sequence. M. Cohen and R. P. McEachran, 1363.
McGowan, J. Wm.
(e^+, He) total scattering. D. G. Costello, D. E. Groce, D. F. Herring, and J. Wm. McGowan, 23.

McKee, B. T. A.
Umklapp annihilation of positronium in crystals. C. H. Hodges, B. T. A. McKee, W. Triftshäuser, and A. T. Stewart, 103.
Positron–vacancy interaction in aluminum. B. T. A. McKee, A. G. D. Jost, and I. K. MacKenzie, 415.
McKellar, A. R. W.
Collision-induced vibrational and electronic spectra of gaseous oxygen at low temperatures. A. R. W. McKellar, N. H. Rich, and H. L. Welsh, 1.
Spectra of H_2–Ne and D_2–Ne Van der Waals complexes in the collision-induced fundamental bands of hydrogen and deuterium. A. R. W. McKellar and H. L. Welsh, 1458.
McKinnon, D.
Measurements of stratospheric methane over North America. R. P. Lowe and D. McKinnon, 668.
McMullen, T.
Lifetime effects in metal soft X-ray spectra. T. McMullen and B. Bergersen, 1002.
McNeill, K. G.
Reactions $^{19}F(\gamma,x\gamma')$ and $^{31}P(\gamma,x\gamma')$. B. J. Thomas, A. Buchnea, J. D. Irish, and K. G. McNeill, 3085.
McQuillan, A. K.
Spatially resolved gain measurements in a CO_2 amplifier. A. K. McQuillan, A. I. Carswell, and K. S. Jammu, 769.
Meinel, H.
A new spectrum probably due to the C_2^+ ion. H. Meinel, 158.
Mercier, G. F.
A study of the (d,p) reaction on ^{62}Ni near the Coulomb barrier. D. Sykes, K. Ramavataram, G. F. Mercier, C. St-Pierre, C. S. Yang, 2096.
Meredith, J. O.
Precise atomic-mass differences in the region $59 \leqslant Z \leqslant 69$. R. C. Barber, R. L. Bishop, J. O. Meredith, F. C. G. Southon, P. Williams, H. E. Duckworth, and P. Van Rookhuyzen, 34.
Nucleon separation and pairing energies, decay energies, and atomic masses for $59 \leqslant Z \leqslant 69$. J. O. Meredith and R. C. Barber, 1195.
Merer, A. J.
Ultraviolet absorption spectrum of thionylimide (HNSO). J. M. Allegretti and A. J. Merer, 404.
Merlet, F.
Quadratic Zeeman effect of donor lines in silicon and germanium. I. Theory. B. Pajot, F. Merlet, G. Taravella, and Ph. Arcas, 1106.
Quadratic Zeeman effect of donor lines in silicon. II. Comparison with experiment. B. Pajot, F. Merlet, and G. Taravella, 2186.
Meyer, J.
Transient light emissions from a laser perturbed plasma. H. A. Baldis, R. A. Nodwell, and J. Meyer, 2338.
Mezei, G.
The magnetic field at tungsten nuclei in iron. J. A. Cameron, L. Keszthelyi, G. Mezei, Z. Szokefalvi-Nagy, and L. Varga, 736.
Miiller, A. P.
Crystal dynamics of platinum by inelastic neutron scattering. D. H. Dutton, B. N. Brockhouse, and A. P. Miiller, 2915.
Miller, C. A.
Search for broad resonances in ^{3}He. S. N. Bunker, M. Jain, C. A. Miller, J. M. Nelson, P. J. Tivin, and W. T. H. van Oers, 1295.
Miller, D. M.
Anomalous annihilation of positrons in several solid hydrocarbons. G. DeBlonde, S. Y. Chuang, B. G. Hogg, D. P. Kerr, and D. M. Miller, 1619.
Miller, E. K.
Analysis of wire antennas in the presence of a conducting half-space. Part I. The vertical antenna in free space. E. K. Miller, A. J. Poggio, G. J. Burke, and E. S. Selden, 879.
Analysis of wire antennas in the presence of a conducting half-space. Part II. The horizontal antenna in free space. E. K. Miller, A. J. Poggio, G. J. Burke, and E. S. Selden, 2614.
Miremadi, B.
The repulsive part of the potential between Hg atoms and light atomic projectiles. A. van Wijngaarden, B. Miremadi, and W. E. Baylis, 1938.
Moehlmann, J. G.
Zeeman effect in the 2782 Å band of HCP. J. G. Moehlmann, A. Hartford, Jr., and J. R. Lombardi, 1705.
Moodie, T. B.
Elastic waves originating at the surface of a spherical opening in nonhomogeneous isotropic media. T. B. Moodie, 2359.
Morrish, A. H.
Mössbauer study of the ferrimagnetic spinel $FeCr_2S_4$. M. R. Spender and A. H. Morrish, 1125.
The magnetic properties and Mössbauer spectra of synthetic samples of Fe_3S_4. M. R. Spender, J. M. D. Coey, and A. H. Morrish, 2313.

Murphy, E.
Surface-induced vectorial optical properties of liquid mercury. E. D. Crozier and E. Murphy, 1914.
Murty, D. S.
Transition probabilities of the 35.5, 428, and 463 keV transitions in ^{125}Te. G. Satyanarayana, V. Lakshminarayana, and D. S. Murty, 600.
Nagi, A. D. S.
Properties of superconducting alloys containing paramagnetic impurities with local states within the gap. A. N. Chaba and A. D. S. Nagi, 1736.
Microscopic theory of tunneling anomalies. Hamann's approximation. M. Howard and A. D. S. Nagi, 2587.
Nagpal, T. S.
The ^{154}Eu → ^{154}Gd decay. T. S. Nagpal and R. E. Gaucher, 2688.
Nath, V. I.
On the uniqueness of MHD aligned flows with given streamlines. O. P. Chandna and V. I. Nath, 661.
Nayar, S. R. P.
External conical refraction of elastic waves in crystals. S. R. P. Nayar and K. S. Viswanathan, 1903.
Neilson, G. C.
Levels of ^{33}Cl via the ^{32}S(d,n)^{33} Cl reaction. S. A. Elbakr, C. Glavina, W. K. Dawson, V. K. Gupta, W. J. McDonald, and G. C. Neilson, 674.
Nelson, J. M.
Search for broad resonances in ^{3}He. S. N. Bunker, M. Jain, C. A. Miller, J. M. Nelson, P. J. Tivin, and W. T. H. van Oers, 1295.
Newman, W. I.
Rapid numerical solution of the one-dimensional Schrödinger equation. W. I. Newman and W. R. Thorson, 2997.
Newton, T. D.
Analysis of counting distributions with a complex exponential character. P. C. Lichtenberger, J. R. Stevens, and T. D. Newton, 345.
Ngo, T. A.
Spectre d'émission de la molécule PO: transition $C^2\,\Sigma^- - X^2\Pi_r$ et nature de l'état C'. B. Coquart, C. Couet, H. Guenebaut, M. Larzillière et T. A. Ngo, 1014.
Spectre d'émission de la molécule PO: la transition $E^2\Delta - X^2\Pi_r$; étude de l'état Rydberg $E^2\Delta$. B. Coquart, M. Larzillière et T. A. Ngo, 2945.
Nichol, L.
Inelastic neutron scattering in the region $A = 11$–40. L. Nichol and T. J. Kennett, 553.
Nicholls, R. W.
The vibration–rotation spectrum of ammonia gas. II. A rotational analysis of the 6450 A band. J. O. P. McBride and R. W. Nicholls, 93.
Nigam, B. P.
ρ-dominance electromagnetic pion form factor with vacuum-polarization insertions. R. A. Buchl and B. P. Nigam, 119.
Ninnis, R. M.
Effects of thermal lensing in glass lasers. R. M. Ninnis and K. E. Rieckhoff, 1656.
Nodwell, R. A.
Transient light emissions from a laser perturbed plasma. H. A. Baldis, R. A. Nodwell, and J. Meyer, 2338.
Noolandi, J.
The use of coherent states in the theory of quantum crystals. J. Noolandi and J. Van Kranendonk, 1815.
Norman, G. R.
Fast neutron cross sections in the $2S$–$1D$ shell. G. R. Norman, W. V. Prestwich, and T. J. Kennett, 2385.
Offenberger, A. A.
Excitation and relaxation of the upper laser state in a CO_2 discharge. B. M. Christophe and A. A. Offenberger, 368.
Ojha, S. P.
Born cross sections for the excitation of helium by fast protons. S. P. Ojha, P. Tiwari, and D. K. Rai, 2253.
O'Kelly, P. D.
Backscattering of electromagnetic waves from a rough surface model. P. D. O'Kelly and M. M. Z. Kharadly, 2928.
Ollerhead, R. W.
A study of levels in ^{25}Mg via the ^{22}Ne(α,nγ)^{25}Mg reaction. D. C. Kean and R. W. Ollerhead, 1539.
Otis, G.
Atmospheric pressure CO_2 pulsed laser with semiconducting plastic electrodes. P. A. Bélanger, R. Tremblay, J. Boivin, and G. Otis, 2753.
Oyarzun, R.
Theory of quantum diffusion in solid hydrogen and deuterium. I. Calculation of the jump frequency. R. Oyarzun and J. Van Kranendonk, 1494.
Pachner, J., Jr.
A computer optimization of the three coil magnetic probe. J. Pachner, Jr., 2726.

Pai, H. L.
Delayed coincidence measurement of the picoseconds lifetime of the 9.699 MeV (5^-) level of ^{28}Si. R. D. Barton, J. S. Wadden, A. L. Carter, and H. L. Pai, 1282.
Page, D. I.
The mean square force on ions in liquid rubidium. P. A. Egelstaff, D. I. Page, and C. Duffill, 3062.
Pajot, B.
Quadratic Zeeman effect of donor lines in silicon and germanium. I. Theory. B. Pajot, F. Merlet, G. Taravella, and Ph. Arcas, 1106.
Quadratic Zeeman effect of donor lines in silicon. II. Comparison with experiment. B. Pajot, F. Merlet, and G. Taravella, 2186.
Pal, S. R.
Nocturnal and semiannual variations of the intensity of 5577 Å emission of atomic oxygen. S. R. Pal and G. M. Shah, 1623.
Pang, S. C.
Number-conserving algebraic method for pairing theory. S. C. Pang and A. Klein, 655.
Pant, M. M.
Paramagnetic spin susceptibility of alkali metals. M. M. Pant and B. Y. Tong, 2678.
Papini, G.
Mass radius of the nucleon. M. G. Hare and G. Papini, 1163.
Paradellis, T.
Concerning the decay of 2.6 h ^{65}Ni. T. Paradellis and A. A. Katsanos, 2728.
Paquette, G.
Circularly polarized waves in magnetoplasmas containing negative ions. N. T. Hung and G. Paquette, 2111.
Pascat, B.
Rotational analysis of bands of the $\tilde{A}^2A_1$–$\tilde{X}^2B_1$ transition of PH_2. J. M. Berthou, B. Pascat, H. Guenebaut, and D. A. Ramsay, 2265.
Patitsas, A. J.
Rainbows, glories, and the scalar field approach. A. J. Patitsas, 3172.
Paul, D. A. L.
Measurement of the total cross sections of positrons on helium atoms in the energy range 15 to 23 eV. B. Jaduszliwer, Wm. C. Keever, and D. A. L. Paul, 1414.
Perluzzo, G.
Mesures de Hall AC dans les oxydes métalliques. G. Perluzzo et J. Yahia, 1379.
Picciotto, C.
Soft-photon cross sections for $\pi^- d \to nn\gamma$. C. Picciotto, 798.
Application of Moffat's model to $\eta \to 3\pi$ and $K \to 3\pi$ decays. D. Smith and C. Picciotto, 1346.
Pilt, A. A.
Band structure in ^{21}Ne. A. A. Pilt, R. H. Spear, R. V. Elliott, D. T. Kelly, J. A. Kuehner, G. T. Ewan, and C. Rolfs, 1286.
Pink, D. A.
Effect of biquadratic exchange upon ferromagnetic two-magnon bound states. D. A. Pink and P. Tremblay, 1728.
Pinnington, E. H.
Beam–foil studies of oxygen below 2000 Å. C. C. Lin, D. J. G. Irwin, J. A. Kernahan, A. E. Livingston, and E. H. Pinnington, 2496.
Poehlman, W. F. S.
Levels in ^{89}Rb populated by the beta decay of ^{89}Kr. W. F. S. Poehlman, B. Singh, and M. W. Johns, 2741.
Poggio, A. J.
Analysis of wire antennas in the presence of a conducting half-space. Part I. The vertical antenna in free space. E. K. Miller, A. J. Poggio, G. J. Burke, and E. S. Selden, 879.
Analysis of wire antennas in the presence of a conducting half-space. Part II. The horizontal antenna in free space. E. K. Miller, A. J. Poggio, G. J. Burke, and E. S. Selden, 2614.
Poole, G. R.
The law of corresponding states as applied to sound velocity in liquids consisting of elliptical molecules. G. R. Poole and Ronald A. Aziz, 721.
Pothier, P. J.
Mössbauer effect study of the hyperfine fields at the tin sites in Cu_2MnSn, Ni_2MnSn, and Pd_2MnSn.D. J. W. Geldart, C. C. M. Campbell, P. J. Pothier, and W. Leiper, 206.
Powell, B. M.
Temperature dependence of a Kohn anomaly in molybdenum. W. J. L. Buyers, B. M. Powell, and A. D. B. Woods, 3069.
Prakash, J.
High temperature dielectric constants of rubidium halides. S. Chandra and J. Prakash, 1053.
Prakash, V. R.
A rotational flow for the study of rotations of deformed even–even nuclei. V. R. Prakash, B. M. Bahal, and V. K. Deshpande, 2957.

Prat, F.
Photoconductivité extrinsèque dans le GaAs. F. Prat et E. Fortin, 2551.
Prentiss, P. O.
Magnetic levitation: linear synchronous motor efficiency. D. L. Atherton, L. E. G. Love, and P. O. Prentiss, 3143.
Prestwich, W. V.
Quadrupole interaction of ^{181}Ta in hafnium oxychloride. H. Zmora, L. M. Lowe, and W. V. Prestwich, 2054.
Fast neutron cross sections in the $2S$–$1D$ shell. G. R. Norman, W. V. Prestwich, and T. J. Kennett, 2385.
Prevot, B.
Shell-model lattice dynamics of CsCl, CsBr, and CsI. C. Carabatos and B. Prevot, 122.
Rotational analysis of the $A^2\Pi$–$X^2\ \Sigma^+$ band system of the BeCl molecule. R. Colin, M. Carleer, and F. Prevot, 171.
Prior, W. R. C.
Fundamental and overtone vibrational transitions in the Raman spectrum of h.c.p. solid hydrogen. W. R. C. Prior and E. J. Allin, 1471.
Pugh, R. E.
Development of the asymptotic action principle. R. E. Pugh, 2939.
Quintenz, J. P.
Multi-modal transient excitation effects in an infinite, parallel-plate wave guide. D. G. Dudley and J. P. Quintenz, 2826.
Rafanelli, K.
On the classical origin of Dirac-like wave equations. K. Rafanelli, 2489.
Rai, D. K.
On the validity of Tietz potential functions for diatomic molecules. S. B. Rai, V. N. Sharma, and D. K. Rai, 428.
Born cross sections for the excitation of helium by fast protons. S. P. Ojha, P. Tiwari, and D. K. Rai, 2253.
Electron impact double ionization of noble gas atoms. B. N. Roy, D. N. Tripathi, and D. K. Rai, 2961.
Rai, S. B.
On the validity of Tietz potential functions for diatomic molecules. S. B. Rai, V. N. Sharma, and D. K. Rai, 428.
Raju, V.
Note on the characteristic temperatures of sphalerite-structure semiconductors. M. D. Aggarwal, V. Raju, and J. K. D. Verma, 1220.
Ramaswamy, V.
Horizontal magnetic dipole embedded in a two-layer conducting medium. V. Ramaswamy, H. W. Dosso, and J. T. Weaver, 607.
Ramavataram, K.
A study of the (d,p) reaction on ^{62}Ni near the Coulomb barrier. D. Sykes, K. Ramavataram, G. F. Mercier, C. St-Pierre, and C. S. Yang, 2096.
Ramavataram, S.
The isospin coupling potential below the quasi-elastic (p,n) thresholds. S. Ramavataram, 2482.
Ramsay, D. A.
Rotational analysis of bands of the $\tilde{A}^2A_1$–$\tilde{X}^2B_1$ transition of PH_2. J. M. Berthou, B. Pascat, H. Guenebaut, and D. A. Ramsay, 2265.
Rao, U. R.
Characteristics of cosmic ray diurnal variation from Deep River neutron and meson data and temperature effects. S. P. Agrawal, A. G. Ananth, and U. R. Rao, 1323.
Rastall, P.
Stretching of spacetime. P. Rastall, 2638.
Raudorf, T. W.
Analysis of wide Lorentzian-shaped electron spin resonance lines. F. T. Hedgcock and T. W. Raudorf, 579.
Razavy, M.
Observable many-body effects of the two-body unobservable potential. N. N. Wong, and M. Razavy, 1614.
q-Equivalent Hamiltonian operators. M. Razavy, 2037.
Read, B. A.
The effect of wind shear gradients on underdense radio meteor decay times. J. Jones and B. A. Read, 1277.
Read, L. A. A.
Microwave phase measurements associated with the Goos–Hänchen shift. L. A. A. Read, I. R. Dagg, and G. E. Reesor, 52.
Redfern, P.
Performance and limitations of shock tubes with imploding detonation drivers. P. Redfern and B. Ahlborn, 1771.
Redlack, A.
The electrostatic potential in a finite ionic crystal. A. Redlack and J. Grindlay, 2815.
Reesor, G. E.
Dielectric loss measurements on nonpolar liquids in the microwave region from 18 to 37 GHz. I. R. Dagg and G. E. Reesor, 2397.
Microwave phase measurements associated with the Goos–Hänchen shift. L. A. A. Read, I. R. Dagg, and G. E. Reesor, 52.
Reichle, H. G., Jr.
Foreign-gas-broadening effects in the 15 μm CO_2 bands. H. G. Reichle, Jr. and C. Young, 2662.

Resnick, L.
Some comments on testing quantum electrodynamics in elastic particle–antiparticle scattering. L. Resnick, 3111.
Rheault, F.
Double-discharge TEA laser beams. R. Fortin, A. K. Laflamme, and F. Rheault, 582.
Selection of a single pulse from a mode-locked TEA CO_2 laser. F. Rheault, J. L. Lachambre, J. Gilbert, R. Fortin, and M. Blanchard, 1876.
Dynamics of the CO_2 atmospheric pressure laser with transverse pulse excitation. J. Gilbert, J. L. Lachambre, F. Rheault, and R. Fortin, 2523.
Ricabarra, G. H.
Neutron activation resonance integral of ^{74}Ge and ^{76}Ge and evaluation of the ^{74}Ge keV neutron radiative capture cross section and resonance integral. M. D. Ricabarra, R. Turjanski, and G. H. Ricabarra, 1978.
Ricabarra, M. D.
Neutron activation resonance integral of ^{74}Ge and ^{76}Ge and evaluation of the ^{74}Ge keV neutron radiative capture cross section and resonance integral. M. D. Ricabarra, R. Turjanski, and G. H. Ricabarra, 1978.
Rich, N. H.
Collision-induced vibrational and electronic spectra of gaseous oxygen at low temperatures. A. R. W. McKellar, N. H. Rich, and H. L. Welsh, 1.
Rieckhoff, K. E.
Effects of thermal lensing in glass lasers. R. M. Ninnis and K. E. Rieckhoff, 1656.
Robinson, A. M.
Effect of capacitance on gain in a transversely pulsed CO_2 discharge. A. M. Robinson, 2138.
Gain distribution in a CO_2 TEA laser. A. M. Robinson, 2471.
Robinson, J. E.
Identification of transverse Kelvin–Helmholtz turbulence in a magnetoplasma column. J. E. Robinson and L. M. Lidsky, 1782.
Roche, A. L.
Calculated Rydberg states of the PO molecule. F. Ackermann, H. Lefebvre-Brion, and A. L. Roche, 692.
Rogers, D. W. O.
The $5/2^-$ resonance at 850 keV in $^{15}N(\alpha,\gamma)^{19}F$. D. W. O. Rogers, J. H. Aitken, and A. E. Litherland, 268.
Resonances in the $^{15}N(\alpha,\gamma)^{19}F$ reaction between $E_\alpha = 1.68$ and 2.72 MeV. D. W. O. Rogers, R. P. Beukens, and W. T. Diamond, 2428.
Rolfs, C.
Band structure in ^{21}Ne. A. A. Pilt, R. H. Spear, R. V. Elliott, D. T. Kelly, J. A. Kuehner, G. T. Ewan, and C. Rolfs, 1286.
Excitation energy of the fourth excited state in ^{18}F. I. Berka, C. Rolfs, and R. E. Azuma, 1682.
Transition strengths of analogue states in $A = 18$ nuclei. C. Rolfs, 1791.
Roque, C. R.
The transition from free-fall to ambipolar diffusion in the mercury afterglow plasma. C. R. Roque and B. C. Gregory, 1436.
Rosen, L.
On the role of N mixing in nuclear problems using Nilsson's model. L. E. H. Trainor, R. J. Turner, C. Tam, and L. Rosen, 740.
Rossetti, C.
Spectroscopie par source laser. I. Etude expérimentale des intensités et largeurs des raies de la transition 00^01–$(10^00, 02^00)_1$ de CO_2. E. Arié, N. Lacome et C. Rossetti, 1800.
Etat stationnaire dans des plasmas CO_2–N_2, CO_2–He et CO_2–N_2–He produits par décharge électrique. D. Bailly, D. Gaultier, C. Rossetti et P. Barchewitz, 2605.
Rostoker, G.
Response time of the magnetosphere to the interplanetary electric field. G. Rostoker, H.-L. Lam, and W. D. Hume, 544.
Roy, B. N.
Electron impact double ionization of noble gas atoms. B. N. Roy, D. N. Tripathi, and D. K. Rai, 2961.
Rybakowski, A.
Photon correlation spectroscopy using a Digital PDP-9 computer. F. R. Hallett, A. L. Gray, A. Rybakowski, J. L. Hunt, and J. R. Stevens, 2368.
Ryce, S. A.
Some effects of charge polarization in nuclear fission. S. A. Ryce, R. R. Wyman, and A. T. Stewart, 2217.
Salie, D. L.
The decay of ^{169}Yb. S. K. Sen, D. L. Salie, and E. Tomchuk, 2348.
Santry, D. C.
Temperature dependence of the hyperfine field at ^{181}Ta nuclei in a nickel lattice. J. S. Barrett, J. A. Cameron, Z. Zámori, and D. C. Santry, 619.
Excitation curves for the reactions of fast neutrons with zinc. D. C. Santry and J. P. Butler, 2536.
Sati, R.
Line shape of C bands in alkali halide phosphors by the method of moments. R. Sati, S. Wang, and M. Inoue, 1370.

Satoh, E.
On the hyperon–nucleon interaction. E. Satoh, 1805.
Satyanarayana, G.
Transition probabilities of the 35.5, 428, and 463 keV transitions in ^{125}Te. G. Satyanarayana, V. Lakshminarayana, and D. S. Murty, 600.
Savard, J.-Y.
Level structure of spin state in the presence of a phonon field. J.-Y. Savard, 2377.
Saxena, K. M. S.
Electron spin–spin contact interaction and mass-variation and Darwin relativistic corrections in isoelectronic series. B. W. N. Lo, K. M. S. Saxena, and S. Fraga, 420.
Accurate numerical Hartree–Fock self-consistent-field wave functions for La^+, Tm^+, and Yb^+. K. M. S. Saxena, 708.
Complete electron spin–spin contact interaction in atoms with f^n configurations. K. M. S. Saxena, B. W. N. Lo, and S. Fraga, 870.
Properties and interactions of lanthanides: interactions with external fields. K. M. S. Saxena and S. Fraga, 1411.
Schiff, H.
Dually charged particles and dual invariance. H. Schiff, 1062.
Schoenberger, R. J.
Tone-bursting of quadrupolar nuclei. Determination of the spin–lattice relaxation times in ferroelectric lithium tantalate and lithium niobate. J. D. Stroud, R. B. Creel, S. L. Segel, and R. J. Schoenberger, 966.
Schott, L.
Propagation of ion acoustic waves from and to a spherical or cylindrical conductor. L. Schott, 506.
Scott, G. B.
Exchange splitting of electron spins in copper-based Kondo alloys. P. T. Coleridge, G. B. Scott, and I. M. Templeton, 1999.
Scott, I. D.
Dimer concentrations in supersonic free jets. R. M. Yealland, J. M. Deckers, I. D. Scott, and C. T. Tuori, 2464.
Segel, S. L.
Nuclear magnetic resonance and quadrupole coupling in hydrous and anhydrous sodium molybdate and sodium tungstate spinel. G. F. Lynch and S. L. Segel, 567.
Tone-bursting of quadrupolar nuclei. Determination of the spin–lattice relaxation times in ferroelectric lithium tantalate and lithium niobate. J. D. Stroud, R. B. Creel, S. L. Segel, and R. J. Schoenberger, 966.
Selden, E. S.
Analysis of wire antennas in the presence of a conducting half-space. Part I. The vertical antenna in free space. E. K. Miller, A. J. Poggio, G. J. Burke, and E. S. Selden, 879.
Analysis of wire antennas in the presence of a conducting half-space. Part II. The horizontal antenna in free space. E. K. Miller, A. J. Poggio, G. J. Burke, and E. S. Selden, 2614.
Semwal, B. S.
Debye characteristic temperatures of cubic metals. B. S. Semwal and P. K. Sharma, 2712.
Sen, S. K.
The decay of ^{169}Yb. S. K. Sen, D. L. Salie, and E. Tomchuk, 2348.
Senicki, E. M. D.
Study of single crystals of magnesium and zinc by positron annihilation. E. H. Becker, E. M. D. Senicki, A. G. Gould, and B. G. Hogg, 2520.
Seshadri, S. R.
Transition radiation from a plasma boundary. S. R. Seshadri, 2244.
Sévigny, L.
Détermination du champ de vitesse du sillage d'une sphère hypersonique à l'aide de peignes de sondes ioniques. L. Sévigny, D. Heckman et A. Emond, 1842.
Structure of turbulent wakes of hypersonic spheres as inferred with ion probes. D. Heckman and L. Sévigny, 2776.
Ion density measurements in the wake of a hypersonic sphere. L. Sévigny, D. Heckman, and P. Caron, 2970.
Shafai, L.
Radiation patterns of antennas near conducting triangular and square towers. L. Shafai, 10.
Erratum: Electromagnetic fields in the presence of cylindrical objects of arbitrary physical properties and cross sections. L. Shafai, 303.
Scattering by spherically symmetrical objects. L. Shafai, 749.
Radiation from an axial slot antenna coated with a homogeneous material. L. Shafai, 3072.
Shah, G. M.
Nocturnal and semiannual variations of the intensity of 5577 Å emission of atomic oxygen. S. R. Pal and G. M. Shah, 1623.
Sharma, P. K.
Pseudopotential calculation of electrical resistivity of alkali metals. P. K. Sharma and S. K. Srivastava, 1907.
Debye characteristic temperatures of cubic metals. B. S. Semwal and P. K. Sharma, 2712.
Sharma, R. C.
Surface distributions of alpha particles from odd-A nuclei. R. Ahooja and R. C. Sharma, 622.

Sharma, V. N.
On the validity of Tietz potential functions for diatomic molecules. S. B. Rai, V. N. Sharma, and D. K. Rai, 428.
Sharpe, I. W.
The Stokes' shift in impurity spectral lines. I. Mathematical technique. R. Barrie and I. W. Sharpe, 222.
The Stokes' shift in impurity spectral lines. II. Relationship to the adiabatic approximation approach. R. Barrie, I. W. Sharpe, and B. L. Jones, 231.
Shefov, N. N.
Remarks on the OH rotational temperature in the night glow. N. N. Shefov, 1225.
Sherman, N. K.
Photoneutron cross sections in ^{14}N. R. W. Gellie, K. H. Lokan, N. K. Sherman, R. G. Johnson, and J. I. Lodge, 1689.
Shin, Y. M.
Search for structure in ^{3}He. D. M. Skopik and Y. M. Shin, 392.
Shing, Y. H.
Matrix elements of the spin–orbit coupling for an l^n configuration in a crystalline electric field. H. A. Buckmaster, R. Chatterjee, and Y. H. Shing, 78.
Ethylsulfate host lattice effects in the EPR spectra of Gd^{3+} ions. H. A. Buckmaster, R. Chatterjee, and Y. H. Shing, 991.
Siara, I.
Sensitized fluorescence in vapors of alkali atoms. XIII. $6^2P_{1/2}$–$6^2P_{3/2}$ excitation transfer in rubidium, induced in collisions with noble gas atoms. I. Siara, E. S. Hrycyshyn, and L. Krause, 1826.
Simpson, J. H.
Schottky-energy calculation: relation between force-balance and energy-minimization procedures. J. H. Simpson, 729.
Singh, B.
Levels in ^{89}Rb populated by the beta decay of ^{89}Kr. W. F. S. Poehlman, B. Singh, and M. W. Johns, 2741.
Singh, B. P.
Low-lying structure and inelastic scattering of Cu isotopes in a unified model. B. Castel, I. P. Johnstone, B. P. Singh, and K. W. C. Stewart, 1630.
Singh, I. S.
Rotational analysis of B–X_2 system of ^{208}PbF. O. Nath Singh, I. S. Singh, and O. N. Singh, 2206.
Singh, O. N.
Rotational analysis of B–X_2 system of ^{208}PbF. O. Nath Singh, I. S. Singh, and O. N. Singh, 2206.
Singh, O. Nath.
Rotational analysis of B–X_2 system of ^{208}PbF. O. Nath Singh, I. S. Singh, and O. N. Singh, 2206.
Singh, S. R.
The Z^{-1} expansion of the nuclear magnetic shielding constant and X-ray form factor for 2-, 3-, and 4-electron ions. R. Benesch, S. R. Singh, and V. H. Smith, Jr., 947.
Singh, Y.
Partly nonlocal potentials in nuclear matter. Y. Singh, C. S. Warke, and R. K. Bhaduri, 2574.
Sizgoric, S.
Experimental analysis of the vibrational–rotational line content of a Q-switched CO_2 laser. S. Sizgoric and A. Waksberg, 1465.
Skirrow, J. D.
EPR spectrometer sensitivity calculations. H. A. Buckmaster and J. D. Skirrow, 1092.
Skopik, D. M.
Search for structure in ^{3}He. D. M. Skopik and Y. M. Shin, 392.
Smith, D.
Application of Moffat's model to $\eta \to 3\pi$ and $K \to 3\pi$ decays. D. Smith and C. Picciotto, 1346.
Smith, J. R.
Measurements of D(d, n)^{3}He neutron polarizations for deuteron energies from 0.87 to 5.00 MeV. J. R. Smith and S. T. Thornton, 783.
Smith, V. H., Jr.
The Z^{-1} expansion of the nuclear magnetic shielding constant and X-ray form factor for 2-, 3-, and 4-electron ions. R. Benesch, S. R. Singh, and V. H. Smith, Jr., 947.
Smulders, P. J. M.
Properties of the 612 keV resonance in the ^{27}Al(p, γ)^{28}Si reaction. N. Anyas-Weiss, A. E. Litherland, and P. J. M. Smulders, 1949.
Smy, P. R.
Shock relaxation in a lightly mass-loaded gas. K. Dimoff, P. R. Smy, and J. Lacoste, 1040.
Sokoloff, J.
Delves principle applied to helium using a numerical excited Hartree basis. J. Sokoloff, 703.
Soots, V.
Second-order Raman spectra of fluorites. I. Critical point analysis. N. Krishnamurthy and V. Soots, 849.
Second-order Raman spectra of fluorites. II. Lattice dynamical analysis. N. Krishnamurthy and V. Soots, 1350.

Souder, A. D.
The effect of contact annealing on Hall data for MoS_2 layer structures. A. D. Souder and D. E. Brodie, 1223.
Alternating current conductivity in MoS_2 layer structures. A. D. Souder and D. E. Brodie, 2228.
Electrical properties of sputtered MoS_2 films. A. D. Souder and D. E. Brodie, 2724.
Southon, F. C. G.
Precise atomic-mass differences in the region $59 \leqslant Z \leqslant 69$. R. C. Barber, R. L. Bishop, J. O. Meredith, F. C. G. Southon, P. Williams, H. E. Duckworth, and P. Van Rookhuyzen, 34.
Spear, R. H.
Band structure in ^{21}Ne. A. A. Pilt, R. H. Spear, R. V. Elliott, D. T. Kelly, J. A. Kuehner, G. T. Ewan, and C. Rolfs, 1286.
Spender, M. R.
Mössbauer study of the ferrimagnetic spinel $FeCr_2S_4$. M. R. Spender and A. H. Morrish, 1125.
The magnetic properties and Mössbauer spectra of synthetic samples of Fe_3S_4. M. R. Spender, J. M. D. Coey, and A. H. Morrish, 2313.
Sprung, D. W. L.
Binding energy of neutron star matter. D. Ellis and D. W. L. Sprung, 2277.
Some extensions of the schematic model for core polarization of the nuclear effective interaction. D. W. L. Sprung and A. M. Jopko, 2768.
Spyker, J. W.
Computing salinity profiles in ice. L. Fertuck, J. W. Spyker, and W. H. W. Husband, 264.
Srivastava, G. P.
Dielectric relaxation of alkyl acetates in aromatic and aliphatic solvents at microwave frequencies. G. P. Srivastava, P. C. Mathur, and Mrs. Krishna, 1449.
Srivastava, S. K.
Pseudopotential calculation of electrical resistivity of alkali metals. P. K. Sharma and S. K. Srivastava, 1907.
Stager, C. V.
Antiferromagnetic resonance in $Mn_2P_2O_7$. D. C. Fowlis, and C. V. Stager, 2681.
Magnetic structure of manganese pyrophosphate and copper pyrophosphate. J. A. R. Stiles and C. V. Stager, 3074.
Standil, S.
Variation with zenith angle of the integral intensity of muons near sea level. R. W. Flint, R. B. Hicks, and S. Standil, 843.
Stevens, J. R.
Analysis of counting distributions with a complex exponential character. P. C. Lichtenberger, J. R. Stevens, and T. D. Newton, 345.
Photon correlation spectroscopy using a Digital PDP-9 computer. F. R. Hallett, A. L. Gray, A. Rybakowski, J. L. Hunt, and J. R. Stevens, 2368.
Stewart, A. T.
Umklapp annihilation of positronium in crystals. C. H. Hodges, B. T. A. McKee, W. Triftshäuser, and A. T. Stewart, 103.
Some effects of charge polarization in nuclear fission. S. A. Ryce, R. R. Wyman, and A. T. Stewart, 2217.
Stewart, K. W. C.
Low-lying structure and inelastic scattering of Cu isotopes in a unified model. B. Castel, I. P. Johnstone, B. P. Singh, and K. W. C. Stewart, 1630.
Stiles, J. A. R.
Magnetic structure of manganese pyrophosphate and copper pyrophosphate. J. A. R. Stiles and C. V. Stager, 3074.
St-Pierre, C.
A study of the (d,p) reaction on ^{62}Ni near the Coulomb barrier. D. Sykes, K. Ramavataram, G. F. Mercier, C. St-Pierre, and C. S. Yang, 2096.
Stringat, R.
Analyse rotationnelle de la bande (0, 0) du système orange de ScO. R. Stringat, C. Athénour et J. L. Féménias, 395.
Stroud, J. D.
Tone-bursting of quadrupolar nuclei. Determination of the spin–lattice relaxation times in ferroelectric lithium tantalate and lithium niobate. J. D. Stroud, R. B. Creel, S. L. Segel, and R. J. Schoenberger, 966.
Stryland, J. C.
The ν_1 band of carbon dioxide in pressure-induced absorption. II. Density and temperature dependence of the intensity; critical phenomena. L. Mannik and J. C. Stryland, 1355.
Svensson, E. C.
Spin-wave excitations in manganese carbonate. T. M. Holden, E. C. Svensson, and P. Martel, 687.
Sykes, D.
A study of the (d,p) reaction on ^{62}Ni near the Coulomb barrier. D. Sykes, K. Ramavataram, G. F. Mercier, C. St-Pierre, and C. S. Yang, 2096.
Szamosi, G.
The nuclear 'repulsive-core' effect as a possible consequence of matter in interaction with a classical relativistic scalar field: a new approach to the question. D. Leiter, J. Huschilt, and G. Szamosi, 636.
Szokefalvi-Nagy, Z.
The magnetic field at tungsten nuclei in iron. J. A. Cameron, L. Keszthelyi, G. Mezei, Z. Szokefalvi-Nagy, and L. Varga, 736.

Talwar, S. P.
Combined Rayleigh and Kelvin instability of a Hall plasma with a vertical magnetic field. G. Bhowmik and S. P. Talwar, 1487.
Tam, G.
On the role of N mixing in nuclear problems using Nilsson's model. L. E. H. Trainor, R. J. Turner, G. Tam, and L. Rosen, 740.
Tam, W. G.
Vibrational energy transfer in carbon monoxide. P. H. Dawson and W. G. Tam, 889.
Vibrational energy transfer probabilities due to Coulomb interaction. W. G. Tam, 2691.
Taras, P.
Study of low-lying levels in ^{37}Ar. P. Taras, A. Turcotte, and R. Vaillancourt, 1182.
Taravella, G.
Quadratic Zeeman effect of donor lines in silicon and germanium. I. Theory. B. Pajot, F. Merlet, G. Taravella, and Ph. Arcas, 1106.
Quadratic Zeeman effect of donor lines in silicon. II. Comparison with experiment. B. Pajot, F. Merlet, and G. Taravella, 2186.
Taylor, T.
Reorientation measurement in ^{56}Fe. J. A. Cameron, A. W. Gibb, T. Taylor, and Z. Zámori, 475.
Teh, H. C.
Model calculations for lattice vibrations in ND_4Cl at 85 °K. H. C. Teh, 2807.
Templeton, I. M.
Exchange splitting of electron spins in copper-based Kondo alloys. P. T. Coleridge, G. B. Scott, and I. M. Templeton, 1999.
Tenti, G.
Kinetic models and Brillouin scattering in a molecular gas. C. D. Boley, R. C. Desai, and G. Tenti, 2158.
Thobe, J. P.
The temperature dependence of the resistivity of liquid gallium to 1000 °C. J. Yahia and J. P. Thobe, 2554.
Thomas, B. J.
Reactions ^{19}F(γ,xγ') and ^{31}P(γ,xγ'). B. J. Thomas, A. Buchnea, J. D. Irish, and K. G. McNeill, 3085.
Thomas, R. J.
Silver film atomic oxygen sensors. R. J. Thomas and D. J. Baker, 1676.
Thornton, S. T.
Measurements of D(d,n)^{3}He neutron polarizations for deuteron energies from 0.87 to 5.00 MeV. J. R. Smith and S. T. Thornton, 783.
Thorson, W. R.
Rapid numerical solution of the one-dimensional Schrödinger equation. W. I. Newman and W. R. Thorson, 2997.
Timsit, R. S.
Structure of the 2^3P–2^3S_1 optical transition of ^{3}He: A study by emission and absorption spectroscopy. R. S. Timsit and A. D. May, 67.
Tindle, C. T.
Resonance widths and unitarity. C. T. Tindle, 84.
Tippett, J. C.
Proton states in ^{155}Tb, ^{157}Tb, ^{159}Tb, and ^{161}Tb. J. C. Tippett and D. G. Burke, 3152.
Tivin, P. J.
Search for broad resonances in ^{3}He. S. N. Bunker, M. Jain, C. A. Miller, J. M. Nelson, P. J. Tivin, and W. T. H. van Oers, 1295.
Tiwari, P.
Born cross sections for the excitation of helium by fast protons. S. P. Ojha, P. Tiwari, and D. K. Rai, 2253.
Tokarsky, R. W.
Alternating current photoconductivity of vacuum-deposited films of CdSe, CdS, and CdTe, excited with intensity-modulated light. R. W. Tokarsky and D. E. Brodie, 1114.
Alternating current photoconductivity in a negative photoconductivity region. R. W. Tokarsky and D. E. Brodie, 1685.
Tokutaka, H.
Langmuir probes in plasma with anisotropic velocity distributions. H. Tokutaka and D. G. Frood, 410.
Tomchuk, E.
Resonant cavities that are frequency insensitive to axial elongation. O. A. Aboul-Atta and E. Tomchuk, 1711.
The decay of ^{169}Yb. S. K. Sen, D. L. Salie, and E. Tomchuk, 2348.
Tomlinson, R. H.
Cumulative yields of the heavy fragments in the fast neutron fission of ^{238}U. C. K. Mathews and R. H. Tomlinson, 3100.
Tondon, V. K.
Zero-point effects in Heisenberg antiferromagnets with arbitrary range of interaction. M. F. Collins and V. K. Tondon, 2991.
Tong, B. Y.
Electronic structure for a distorted chain. T. C. Wong and B. Y. Tong, 1078.
Paramagnetic spin susceptibility of alkali metals. M. M. Pant and B. Y. Tong, 2678.

Torrens, A. B.
Oscillation and photoresponse of high-resistivity *n*-GaAs diodes. A. B. Torrens and L. Young, 1098.
Tošić, B. S.
Theory of biexcitons. M. Božić-Popović, D. I. Lalović, B. S. Tošić, and R. B. Žakula, 898.
Toulemonde, M.
Mesures de rapports d'embranchement et de vies moyennes dans ^{30}Si. A. Gallmann, F. Haas et M. Toulemonde, 278.
Trainor, L. E. H.
On the role of *N* mixing in nuclear problems using Nilsson's model. L. E. H. Trainor, R. J. Turner, G. Tam, and L. Rosen, 740.
Tremblay, P.
Effect of biquadratic exchange upon ferromagnetic two-magnon bound states. D. A. Pink and P. Tremblay, 1728.
Tremblay, R.
Atmospheric pressure CO_2 pulsed laser with semiconducting plastic electrodes. P. A. Bélanger, R. Tremblay, J. Boivin, and G. Otis, 2753.
Triftshäuser, W.
Umklapp annihilation of positronium in crystals. C. H. Hodges, B. T. A. McKee, W. Triftshäuser, and A. T. Stewart, 103.
Tripathi, D. N.
Electron impact double ionization of noble gas atoms. B. N. Roy, D. N. Tripathi, and D. K. Rai, 2961.
Truant, P. T.
Nuclear spin–lattice relaxation in superconducting Al. J. P. Carbotte and P. T. Truant, 563.
Tull, C. E.
Electric quadrupole transitions in Na I, Mg II, and Al III. C. E. Tull, M. Jackson, R. P. McEachran, and M. Cohen, 1169.
Tuori, C. T.
Dimer concentrations in supersonic free jets. R. M. Yealland, J. M. Deckers, I. D. Scott, and C. T. Tuori, 2464.
Turcotte, A.
Study of low-lying levels in ^{37}Ar. P. Taras, A. Turcotte, and R. Vaillancourt, 1182.
Turjanski, R.
Neutron activation resonance integral of ^{74}Ge and ^{76}Ge and evaluation of the ^{74}Ge keV neutron radiative capture cross section and resonance integral. M. D. Ricabarra, R. Turjanski, and G. H. Ricabarra, 1978.
Turner, R.
Doppler-shifted cyclotron resonance in thin metal films. R. Turner and J. F. Cochran, 2122.
A new technique for measuring the velocity of sound in liquid metals. R. Turner, E. D. Crozier, and J. F. Cochran, 2735.
Turner, R. J.
On the role of *N* mixing in nuclear problems using Nilsson's model. L. E. H. Trainor, R. J. Turner, G. Tam, and L. Rosen, 740.
Turrell, B. G.
The magnetic moment of ^{59}Fe. P. W. Daly, R. L. A. Gorling, P. W. Martin, and B. G. Turrell, 2273.
Tyson, W. R.
Elastic and plastic anisotropy of white tin. N. S. Brar and W. R. Tyson, 2257.
Vaillancourt, R.
Study of low-lying levels in ^{37}Ar. P. Taras, A. Turcotte, and R. Vaillancourt, 1182.
Vallance Jones, A.
Quantitative spectroscopy of the aurora. I. The spectrum of bright aurora between 7000 and 9000 Å at 7.5 Å resolution. A. Vallance Jones and R. L. Gattinger, 1833.
Vandenberghe, F. H.
On the inverse problem of scattering from a perfectly conducting prolate spheroid. F. H. Vandenberghe and W. M. Boerner, 754.
On the inverse problem of scattering from a perfectly conducting elliptic cylinder. F. H. Vandenberghe and W. M. Boerner, 1987.
van der Linde, J.
Zero field level crossing in excited states of molecular hydrogen. J. van der Linde and F. W. Dalby, 287.
Van der Meer, M. P.
Thermal and electrical conductivities of sodium from 40 to 360 K. J. G. Cook, M. P. Van der Meer, and M. J. Laubitz, 1386.
Van Driel, H. M.
The observation of incipient phase transitions in K_2PtCl_6, K_2PdCl_6, and K_2IrCl_6. R. L. Armstrong and H. M. Van Driel, 2048.
Van Kranendonk, J.
Theory of intercollisional interference effects. I. Induced absorption in a Lorentz gas. J. C. Lewis and J. Van Kranendonk, 352.
Theory of quantum diffusion in solid hydrogen and deuterium. I. Calculation of the jump frequency. R. Oyarzun and J. Van Kranendonk, 1494.
The use of coherent states in the theory of quantum crystals. J. Noolandi and J. Van Kranendonk, 1815.
Theory of intercollisional interference effects. III. Collision-induced light scattering. J. C. Lewis and J. Van Kranendonk, 2902.

van Oers, W. T. H.
Search for broad resonances in ^{3}He. S. N. Bunker, M. Jain, C. A. Miller, J. M. Nelson, P. J. Tivin, and W. T. H. van Oers, 1295.
Van Rookhuyzen, P.
Precise atomic-mass differences in the region $59 \leqslant Z \leqslant 69$. R. C. Barber, R. L. Bishop, J. O. Meredith, F. C. G. Southon, P. Williams, H. E. Duckworth, and P. Van Rookhuyzen, 34.
van Wijngaarden, A.
The repulsive part of the potential between Hg atoms and light atomic projectiles. A. van Wijngaarden, B. Miremadi, and W. E. Baylis, 1938.
Varga, L.
The magnetic field at tungsten nuclei in iron. J. A. Cameron, L. Keszthelyi, G. Mezei, Z. Szokefalvi-Nagy, and L. Varga, 736.
Varshni, Y. P.
Geometric-mean wave function for HeH^{2+}. C. S. Lam and Y. P. Varshni, 666.
Verma, J. K. D.
Note on the characteristic temperatures of sphalerite-structure semiconductors. M. D. Aggarwal, V. Raju, and J. K. D. Verma, 1220.
Verma, R. D.
Emission spectrum of the PO molecule. Part III. Spectrum in the red region. S. Guha, S. Jois, and R. D. Verma, 1579.
Viswanathan, K. S.
External conical refraction of elastic waves in crystals. S. R. Prabhakaran Nayar and K. S. Viswanathan, 1903.
Vogt, E. W.
On the interaction of positrons with argon. P. W. Hewson, G. Jones, and E. W. Vogt, 821.
Vrba, J.
Glow-discharge oxidation of freshly evaporated aluminum films. J. Vrba and S. B. Woods, 548.
Wadden, J. S.
Delayed coincidence measurement of the picoseconds lifetime of the 9.699 MeV (5^-) level of ^{28}Si. R. D. Barton, J. S. Wadden, A. L. Carter, and H. L. Pai, 1282.
Waddington, J. C.
Interference effects in two-step reaction processes. D. G. Burke and J. C. Waddington, 700.
Wait, J. R.
Electromagnetic scattering of a small spherical obstacle near the ground. D. A. Hill and J. R. Wait, 237.
On the theory of transient electromagnetic sounding over a stratified earth. J. R. Wait, 1055.
Theory of electromagnetic reflection from a parallel grid of dielectric coated wires buried in the earth. J. R. Wait, 2149.
Electromagnetic wave propagation along a buried insulated wire. J. R. Wait, 2402.
Waksberg, A.
Experimental analysis of the vibrational–rotational line content of a Q-switched CO_2 laser. S. Sizgoric and A. Waksberg, 1465.
Waksberg, A. L.
Gain correlation with sidelight and plasma impedance properties of a CO_2 laser discharge. R. A. Crane and A. L. Waksberg, 3067.
Walker, M. B.
Quantum-field theoretic analysis of paramagnetic spin–lattice relaxation. R. Hernández and M. B. Walker, 440.
Walkley, J.
Perturbation calculations for a triangular well potential at low densities. D. N. Card and J. Walkley, 1419.
Wang, S.
On the electronic polarization effect on excitons in insulators. C. K. Mahutte, M. Matsuura, and S. Wang, 375.
Line shape of C bands in alkali halide phosphors by the method of moments. R. Sati, S. Wang, and M. Inoue, 1370.
Wang, S. S.
Experimental data concerning the quadruplet correlation function of simple liquids. P. A. Egelstaff and S. S. Wang, 684.
Density dependent potentials in simple liquids. P. A. Egelstaff and S. S. Wang, 2461.
Ward, D.
Measurement of stopping powers for ^{4}He, ^{16}O, and ^{35}Cl ions at $\sim$1 to $\sim$3 MeV per nucleon in Ni, Ge, Y, Ag, and Au. D. Ward, R. L. Graham, and J. S. Geiger, 2302.
Ward, R. W.
Extended temperature range measurements of thermoluminescence due to Gd^{3+} ions in CaF_2. R. W. Ward and P. W. Whippey, 1409.
Warke, C. S.
Partly nonlocal potentials in nuclear matter. Y. Singh, C. S. Warke, and R. K. Bhaduri, 2574.
Weaver, J. T.
Horizontal magnetic dipole embedded in a two-layer conducting medium. V. Ramaswamy, H. W. Dosso, and J. T. Weaver, 607.

Webb, J. B.
Polarizability of a bias–temperature drifted species in thin film transistor structures. J. B. Webb and D. E. Brodie, 1023.
Welsh, H. L.
Collision-induced vibrational and electronic spectra of gaseous oxygen at low temperatures. A. R. W. McKellar, N. H. Rich, and H. L. Welsh, 1.
Spectra of H_2–Ne and D_2–Ne Van der Waals complexes in the collision-induced fundamental bands of hydrogen and deuterium. A. R. W. McKellar and H. L. Welsh, 1458.
The fundamental infrared absorption band of ortho-enriched solid hydrogen. S. A. Boggs, M. J. Clouter, and H. L. Welsh, 2063.
West, R. N.
Calculations of angular distributions from metals using positron wave functions with proper crystal symmetry. A. G. Gould, R. N. West, and B. G. Hogg, 2294.
Whalley, E.
The intensities of the infrared-active intermolecular translational bands in solid chlorine. Evidence for intermolecular bonding. P. T. T. Wong and E. Whalley, 1856.
Whippey, P. W.
Electron spin resonance in neutron-irradiated diamond. P. W. Whippey, 803.
Extended temperature range measurements of thermoluminescence due to Gd^{3+} ions in CaF_2. R. W. Ward and P. W. Whippey, 1409.
Whitlock, R. F.
Rotational dependence of Franck–Condon factors in the $A^1\Sigma_u^+ \leftarrow X^1\Sigma_g^+$ system of $^{24}Mg_2$. W. J. Balfour and R. F. Whitlock, 1648.
Wilcox, P.
A dielectric loss model based on interfacial electron tunneling. P. Wilcox, 912.
Wilhelm, H. E.
Nonlinear eigenvalue problem of a self-sustained electrical discharge. H. E. Wilhelm, 1156.
Nonlinear boundary-value problem for a conducting source flow in an inhomogeneous magnetic field. H. E. Wilhelm, 2327.
Williams, P.
Precise atomic-mass differences in the region $59 \leqslant Z \leqslant 69$. R. C. Barber, R. L. Bishop, J. O. Meredith, F. C. G. Southon, P. Williams, H. E. Duckworth, and P. Van Rookhuyzen, 34.
Winterbon, K. B.
On Doppler-shift attenuation measurements. K. B. Winterbon, 3147.
Wong, N. N.
Observable many-body effects of the two-body unobservable potential. N. N. Wong and M. Razavy, 1614.
Wong, P. T. T.
The intensities of the infrared-active intermolecular translational bands in solid chlorine. Evidence for intermolecular bonding. P. T. T. Wong and E. Whalley, 1856.
Wong, T. C.
Electronic structure for a distorted chain. T. C. Wong and B. Y. Tong, 1078.
Woods, A. D. B.
Temperature dependence of a Kohn anomaly in molybdenum. W. J. L. Buyers, B. M. Powell, and A. D. B. Woods, 3069.
Woods, S. B.
Glow-discharge oxidation of freshly evaporated aluminum films. J. Vrba and S. B. Woods, 548.
Woolley, J. C.
Conduction band parameters in GaSb from high-temperature transport measurements. J. Basinski, C. C. Y. Kwan, and J. C. Woolley, 1068.
Wyman, R. R.
Some effects of charge polarization in nuclear fission. S. A. Ryce, R. R. Wyman, and A. T. Stewart, 2217.
Yahia, J.
Longitudinal magnetoresistance in gallium at 20.3 °K. J. Yahia and C. Lee, 858.
Mesures de Hall AC dans les oxydes métalliques. G. Perluzzo et J. Yahia, 1379.
The temperature dependence of the resistivity of liquid gallium to 1000 °C. J. Yahia and J. P. Thobe, 2554.
Yakimiw, E.
Nonleptonic weak decays of hyperons and the algebra of currents. E. Yakimiw, 873.
Weak radiative decays of hyperons in the pole model. E. Yakimiw and G. Jakimiw, 1300.
Yang, C. S.
A study of the (d,p) reaction on ^{62}Ni near the Coulomb barrier. D. Sykes, K. Ramavataram, G. F. Mercier, C. St-Pierre, and C. S. Yang, 2096.
Yealland, R. M.
Dimer concentrations in supersonic free jets. R. M. Yealland, J. M. Deckers, I. D. Scott, and C. T. Tuori, 2464.
Yip, G. L.
The excitation of resonances by a dipole antenna inside a hollow cylindrical plasma. G. L. Yip, 2628.

Young, C.
Foreign-gas-broadening effects in the 15 μm CO_2 bands. H. G. Reichle, Jr. and C. Young, 2662.
Young, L.
Oscillation and photoresponse of high-resistivity *n*-GaAs diodes. A. B. Torrens and L. Young, 1098.
Yuen, K.
Radiative recombination in cadmium sulfide. K. Colbow and K. Yuen, 1518.
Zaidi, H. R.
Velocity dependence of the scattering amplitudes in resonant collisions. H. R. Zaidi, 1175.
Coherent radiation damping. H. R. Zaidi, 1427.
Collisional narrowing and the foreign gas broadening of spectral line shapes. H. R. Zaidi, 2792.
Excitation transfer process in self-broadening. H. R. Zaidi, 2801.
Žakula, R. B.
Theory of biexcitons. M. Božić-Popović, D. I. Lalović, B. S. Tošić, and R. B. Žakula, 898.
Zámori, Z.
Reorientation measurement in ^{56}Fe. J. A. Cameron, A. W. Gibb, T. Taylor, and Z. Zámori, 475.
Temperature dependence of the hyperfine field at ^{181}Ta nuclei in a nickel lattice. J. S. Barrett, J. A. Cameron, Z. Zámori, and D. C. Santry, 619.
Zardecki, A.
Détermination de la surface de cohérence à partir d'une expérience de photocomptage. J. Bures, C. Delisle et A. Zardecki, 760.
Théorie exacte de la distribution de la somme des photoélectrons émis en *L* points. J. Bures, C. Delisle et A. Zardecki, 1307.
Zmora, H.
Quadrupole interaction of ^{181}Ta in hafnium oxychloride. H. Zmora, L. M. Lowe, and W. V. Prestwich, 2054.
